Abstracts

The global Sumi Ink Stick market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In China and Japan, sumi (black inkstick) is regarded as one of the bunboh-shihoh (“four treasures of stationery”) together with fude (writing brush), hanshi (thin paper), and suzuri (inkstone), and is treated respectfully as a tool for composing letters. Since sumi is a solid stick, ink liquid is produced by rubbing the inkstick against inkstone with water. Sumi writing has been found on a wooden plate in ancient China, and on a late 2nd century ceramic in Mie Prefecture — the oldest sumi in Japan.
