## Abstracts

According to our (Global Info Research) latest study, the global Sunscreen Lip Balm market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Sunscreen lip balm is a type of lip care product that provides protection against the harmful effects of the sun's ultraviolet (UV) rays. It is specifically designed to be applied to the lips, which are prone to dryness and sun damage.

The sunscreen lip balm contains ingredients, such as UV filters or sunscreens, that help to block or absorb UV radiation. These ingredients typically fall into two categories: physical blockers, such as zinc oxide or titanium dioxide, and chemical absorbers, including avobenzone. The lip balm may also contain moisturizing ingredients like shea butter, beeswax, or oils to nourish and hydrate the lips.

When applied to the lips, the sunscreen lip balm forms a protective layer that reflects or absorbs UV radiation, reducing the risk of sunburn, dryness, and potential long-term damage, such as premature aging or lip cancer. It is recommended to apply the lip balm liberally and regularly, especially when spending time outdoors in sunny conditions.

The Global Info Research report includes an overview of the development of the Sunscreen Lip Balm industry chain, the market status of Male (SPF30, SPF36), Female (SPF30, SPF36), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Sunscreen Lip Balm.
