## Abstracts

According to our (Global Info Research) latest study, the global Super Precision Single Row Cylindrical Roller Bearing market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Super-precision single row cylindrical roller bearings include bearings with tapered holes and cages. The linear expansion generated during operation is compensated by the floating between the roller and the raceway. It is an ideal floating bearing with high precision. Characterized by high radial stiffness, super precision cylindrical roller bearings can be used as non-locating bearings and can also be used in other demanding bearing arrangements.
