## Abstracts

The global Supercharger market size is expected to reach \$ 5002 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

In 2025, global Supercharger production reached approximately 1.83 million Units, with an average global market price of around US\$ 1961 per unit.

A supercharger (also known as a blower) is an air compressor used to force air into the combustion chambers of an internal combustion engine at pressures higher than would otherwise be the case. A supercharger is a unit that bolts to your engine and connects with a belt between your crankshaft and the supercharger unit.

The global Supercharger market will maintain explosive double-digit growth, with APAC as the volume engine and North America/Europe as high-margin leaders. Key shifts:

- Power race continues: 480–600 kW becomes mainstream; ?1 MW megachargers enter commercial scale for heavy-duty.
