Global Supercritical Extraction Services Market 2026 by Company, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/G38CB79C76D0EN.html
Date: November 2026
Pages: 178
Price: US$ 3,480.00 (Single User License)
ID: G38CB79C76D0EN

Abstracts

According to our (Global Info Research) latest study, the global Supercritical Extraction Services market size was valued at US$ 86.75 million in 2025 and is forecast to a readjusted size of US$ 133 million by 2032 with a CAGR of 6.2% during review period.

Supercritical fluid extraction (SFE) services are commissioned extraction and separation services provided by third-party professional organizations with high-pressure fluid process development and actual production facilities for clients in the food ingredients, natural plant products, nutritional health products, pharmaceuticals and biomaterials, cosmetic active ingredients, flavors and fragrances, and some industrial materials industries.

Key Findings

Supercritical Extraction Services cover both ?50L development capacity and ?50L commercial production capacity

?40MPa and ?40MPa processes form two distinct operating ranges for different separation requirements

Target-component extraction and impurity-removal purification constitute the two principal process objectives

Food beverage flavors fragrances nutrition health and functional foods form the core downstream application structure

+357 96 030922
info@marketpublishers.com

Integrated process development scale-up toll production and post-extraction processing are becoming key service capabilities

Market Trends

Supercritical Extraction Services are developing from relatively standalone toll-extraction operations toward integrated technical-service platforms covering process development, scale-up and commercial production. Customers increasingly expect service providers to participate at an earlier stage, beginning with raw-material evaluation, feasibility tests and extraction-parameter optimization and continuing through pilot production, industrial scale-up, fractionation, purification and quality verification. This trend increases the strategic value of flexible equipment platforms capable of handling different vessel volumes and operating pressures, because the technical continuity between laboratory development and industrial manufacturing directly affects commercialization efficiency. At the same time, the service objective is expanding from recovery of target natural compounds toward deodorization, decontamination, defatting, concentration and selective removal of undesirable components. Product quality requirements in flavors, fragrances, nutrition and functional foods are also increasing the importance of low-temperature processing, compound selectivity, reproducibility and downstream finishing. Service providers are consequently competing increasingly through process know-how, analytical capability, scale-up experience and integrated production support rather than extraction capacity alone.

Market Dynamics

Drivers

Demand for Supercritical Extraction Services is supported by the expanding commercial use of natural extracts, concentrated botanical ingredients, flavors, fragrances, nutritional ingredients and functional-food formulations where purity, selective separation and preservation of sensitive compounds are important processing requirements. Supercritical-fluid technology offers an adjustable extraction environment in which pressure and temperature can be used to modify solvent density and component selectivity, supporting differentiated product specifications. Food-related applications also benefit from an established regulatory foundation for carbon dioxide extraction; the European Union permits carbon dioxide as an extraction solvent for foodstuffs and food ingredients when used in accordance with good manufacturing

+357 96 030922
info@marketpublishers.com

practice. Outsourcing further reduces the need for customers to invest directly in specialized high-pressure vessels, pumping systems, separators, analytical laboratories and trained process personnel, making contract services particularly relevant for companies with variable production volumes or products moving from development into commercial manufacturing.

Restraints

The principal restraints arise from high equipment investment, complex process development and relatively demanding plant operation. Industrial supercritical extraction requires pressure-rated extraction vessels, fluid compression and circulation equipment, temperature-control systems, separators, instrumentation and extensive safety controls, creating significant fixed-cost requirements for service providers. Extraction performance is also sensitive to raw-material moisture, particle size, composition, pretreatment and the interaction among pressure, temperature, fluid flow and residence time. A process developed for one botanical or ingredient therefore often requires substantial adjustment before being transferred to another material. Small or highly customized projects can involve comparatively high setup, cleaning, sampling and analytical costs, while frequent product changeovers may reduce effective utilization of industrial equipment. For customers, service economics must therefore balance extraction yield and product quality against development expenditure, batch size, processing time and subsequent purification requirements.

Opportunities

The principal opportunities lie in higher-value ingredients and increasingly sophisticated separation objectives. Target-component extraction continues to provide the fundamental demand base, while impurity-removal purification expands the addressable market toward deodorization, decontamination, selective removal of unwanted fractions and improvement of final ingredient specifications. Natural flavors, fragrance materials, botanical actives, specialty nutritional lipids and functional-food ingredients provide favorable application environments where selective recovery and preservation of product characteristics can justify more advanced processing. Another major opportunity is the transition from R&D to commercial production. Providers capable of operating across ?50L development systems and ?50L industrial equipment can retain projects through feasibility testing, pilot validation and recurring production. Additional value can be captured by combining extraction with fractionation, analytical testing, formulation, concentration and other post-extraction processing, thereby increasing the

+357 96 030922
info@marketpublishers.com

depth of customer engagement and the proportion of project value retained within the service platform.

Challenges

The long-term challenge for Supercritical Extraction Services is maintaining reproducible process performance while achieving acceptable industrial economics across highly variable customer materials. Natural feedstocks can differ by variety, origin, harvest conditions, storage and preprocessing, requiring repeated characterization and parameter adjustment. Scale-up is technically complex because increasing vessel volume also changes mass transfer, flow distribution, loading behavior and extraction-cycle economics. Higher-pressure processing broadens the technical operating range but increases equipment strength requirements, maintenance costs, energy consumption and validation complexity. Service providers must also manage cross-contamination, cleaning verification, batch traceability, customer confidentiality and different quality-management requirements across food, nutrition and specialty applications. As downstream customers become more technically sophisticated, the ability to demonstrate repeatable extraction curves, stable specifications and predictable laboratory-to-industrial scale-up becomes increasingly important, raising the requirements for experienced process teams and analytical infrastructure.

Value Chain Analysis

The upstream value chain for Supercritical Extraction Services consists primarily of natural raw materials and other customer feedstocks, process fluids, pretreatment operations and analytical inputs. Herbs, seeds, grains, fruits, botanical materials, oils and other feedstocks generally require controlled drying, milling, particle-size adjustment or moisture management before extraction, and these variables can materially influence final yield and selectivity. Midstream value creation begins with feasibility assessment and laboratory development, followed by parameter optimization, pilot validation and process scale-up. During commercial operation, the supercritical fluid passes through the extraction vessel under controlled conditions, dissolves selected components and is subsequently subjected to one or more separation stages that recover target fractions. Additional operations may include fractionation, deodorization, purification, filtration, concentration and quality testing according to customer specifications.

+357 96 030922
info@marketpublishers.com

The cost structure is driven by depreciation of high-pressure equipment, compression and circulation energy, labor, maintenance, cleaning, laboratory testing, quality systems and equipment utilization. Accordingly, profitability is strongly linked to production scheduling, batch size, throughput and the conversion of development projects into recurring commercial campaigns. Flexible service providers can create value by transferring one process across laboratory, pilot and production scales while maintaining product specifications. Downstream customers in food and beverage, flavors and fragrances, nutrition and health, functional foods and other specialized ingredient markets ultimately capture value through differentiated extracts, improved purity, consistent product performance and shorter internal development cycles. This makes technical support and reliable scale-up an important part of the commercial value proposition.

Segment Insights

By extraction-vessel volume, ?50L Supercritical Extraction Services primarily support feasibility studies, laboratory development, pilot validation, specialized low-volume products and early commercialization. This segment plays an important technical role because it allows pressure, temperature, extraction time, fluid flow and separation settings to be optimized before customers commit to larger manufacturing campaigns. ?50L services are more closely associated with industrial scale-up and commercial contract production, and established providers operate equipment extending from pilot capacities into large industrial vessels. The coexistence of small and large systems therefore reflects different stages of the customer commercialization cycle rather than purely different end-use markets. Officially disclosed service facilities demonstrate that commercial suppliers can maintain multiple vessel sizes within the same processing platform, enabling projects to progress from R&D to industrial production without rebuilding the entire extraction methodology.

By extraction process pressure, ?40MPa represents the principal operating range for many conventional natural-material extraction programs, while ?40MPa provides a wider technical window for applications requiring greater fluid density, different solubility characteristics or more demanding selective separation. The higher-pressure category is therefore associated with specialized extraction and purification opportunities as well as greater equipment and operating requirements. By process objective, target-component extraction focuses on selectively recovering and concentrating valuable fractions, whereas impurity-removal purification focuses on reducing unwanted odors, contaminants or non-target components. The boundary between the two objectives is becoming more integrated in commercial projects as customers increasingly require

+357 96 030922
info@marketpublishers.com

both enrichment of valuable components and improvement of final product specifications within the same processing workflow.

Downstream Market Opportunities

Food and beverage represents an important recurring application for Supercritical Extraction Services because manufacturers use natural extracts, specialty oils and concentrated botanical ingredients across flavoring and functional formulations. Flavors and fragrances offer attractive opportunities where preservation of aromatic or volatile compounds and precise selectivity are particularly important; Robertet's continued development of supercritical extraction for natural fragrance and flavor materials illustrates the strategic relevance of this processing route in high-value sensory ingredients. Nutrition and health and functional-food applications increasingly emphasize active-component concentration, product consistency, traceability and quality documentation, supporting demand for integrated extraction, purification and analytical services. Across these downstream sectors, an important commercial opportunity comes from small and medium development projects that can progress into recurring industrial batches after pilot validation, favoring service providers that combine flexible development capacity with stable commercial manufacturing.

Regional Insights

Europe represents a mature cluster for Supercritical Extraction Services, supported by established botanical-processing, flavor, fragrance, food and specialty-ingredient industries and by service providers with capabilities spanning R&D, pilot work and industrial contract extraction. The regional regulatory framework for food-processing extraction solvents also provides clear conditions for carbon dioxide use, supporting commercial adoption in food and ingredient processing. Companies such as NATECO?, agroCO?, Robertet, EXTRATEX, Sequoya Biotechnologies, FLAVEKO Trade s.r.o., Essentia Pura d.o.o. and Biotech Evolution Sp. z o.o. reflect the diversity of European participation, ranging from dedicated contract processing to vertically integrated natural-ingredient and technology platforms.

North America has established strengths in process development, toll manufacturing and high-pressure extraction technology, with Thar Process, Vesta Nutra, Hyperbaric Technologies and Canurta Naturals representing different service models across natural ingredients and specialty processing. Asia combines a broad botanical-material base with growing ingredient-manufacturing and high-pressure processing capabilities.

+357 96 030922
info@marketpublishers.com

Nanyang Plant Essence Extraction Co., Ltd., Harbin Aisen Biotechnology, Jiangsu J.D.Y Biotechnology Co., Ltd., Kaizuka Genmatsu Co., Ltd., ASIA GIANT, Field & Device Co., Ltd., Taiwan Supercritical Technology Co., Ltd., Supercritical Technology Center Co., Ltd. and other regional participants support an increasingly diversified supply base. Regional competitiveness is therefore influenced by raw-material access, processing cost, quality systems, technical specialization and the ability to support international customers from product development through commercial production.

Competitive Landscape Analysis

The competitive landscape of Supercritical Extraction Services is characterized by a mix of dedicated contract processors, natural-ingredient companies, process-technology specialists and vertically integrated manufacturers. NATECO? emphasizes large-scale contract extraction together with R&D-to-industrial scale-up, fractionation and purification capabilities, while Thar Process combines process development, toll manufacturing, analytical support, extraction and downstream purification within a broader supercritical-fluid technology platform. Robertet integrates supercritical extraction into its natural fragrance, flavor and ingredient activities and has continued to strengthen this capability strategically, while agroCO? represents a plant-focused toll and contract manufacturing model. EXTRATEX combines supercritical process development, equipment engineering, scale-up and production capabilities. Other confirmed participants—including Sequoya Biotechnologies, FLAVEKO Trade s.r.o., Vesta Nutra, Vidya Europe, Essentia Pura d.o.o., Ominedo Pharmaceutical Industry Co., Ltd., Hyperbaric Technologies, Canurta Naturals, Nanyang Plant Essence Extraction Co., Ltd., Extractom, Harbin Aisen Biotechnology, Biotech Evolution Sp. z o.o., Jiangsu J.D.Y Biotechnology Co., Ltd., Kaizuka Genmatsu Co., Ltd., SCENZA, Cyanotech Corporation, Rubian Extratos, ASIA GIANT, Field & Device Co., Ltd., Taiwan Supercritical Technology Co., Ltd., Kriya Ltd., Supercritical Technology Center Co., Ltd., TIBD Co., Ltd. and MSTEM LAB—reflect significant variation in geographic focus, downstream specialization and degree of vertical integration. Competitive differentiation increasingly depends on process-development depth, pressure and vessel flexibility, scale-up reproducibility, analytical and quality systems, application expertise and the ability to convert development work into stable recurring production.

Report Scope

This report is a detailed and comprehensive analysis for global Supercritical Extraction

+357 96 030922
info@marketpublishers.com

Services market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Supercritical Extraction Services market size and forecasts, in consumption value ($ Million), 2021-2032

Global Supercritical Extraction Services market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global Supercritical Extraction Services market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global Supercritical Extraction Services market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Supercritical Extraction Services

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Supercritical Extraction Services market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include NATECO?, Thar Process, Inc., Robertet S.A., agroCO?,

+357 96 030922
info@marketpublishers.com

Sequoya Biotechnologies, FLAVEKO Trade s.r.o., Vesta Nutra, Vidya Europe, Essentia Pura d.o.o., EXTRATEX, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Supercritical Extraction Services market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Chapter Outline

Chapter 1, to describe Supercritical Extraction Services product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Supercritical Extraction Services, with revenue, gross margin, and global market share of Supercritical Extraction Services from 2021 to 2026.

Chapter 3, the Supercritical Extraction Services competitive situation, revenue, and global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and by Application, with consumption value and growth rate by Type, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026.and Supercritical Extraction Services market forecast, by regions, by Type and by Application, with consumption value, from 2027 to 2032.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis.

Chapter 12, the key raw materials and key suppliers, and industry chain of Supercritical Extraction Services.

Chapter 13, to describe Supercritical Extraction Services research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Classification of Supercritical Extraction Services by Type
  1.3.1 Overview: Global Supercritical Extraction Services Market Size by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Global Supercritical Extraction Services Consumption Value Market Share by Type in 2025
  1.3.3 Target Component Extraction Type
  1.3.4 Impurity Removal and Purification Type
1.4 Classification of Supercritical Extraction Services by Total Extraction Vessel Volume
  1.4.1 Overview: Global Supercritical Extraction Services Market Size by Total Extraction Vessel Volume: 2021 Versus 2025 Versus 2032
  1.4.2 Global Supercritical Extraction Services Consumption Value Market Share by Total Extraction Vessel Volume in 2025
  1.4.3 ?50L
  1.4.4 ?50L
1.5 Classification of Supercritical Extraction Services by Extraction Process Pressure
  1.5.1 Overview: Global Supercritical Extraction Services Market Size by Extraction Process Pressure: 2021 Versus 2025 Versus 2032
  1.5.2 Global Supercritical Extraction Services Consumption Value Market Share by Extraction Process Pressure in 2025
  1.5.3 ?40MPa
  1.5.4 ?40MPa
1.6 Global Supercritical Extraction Services Market by Application
  1.6.1 Overview: Global Supercritical Extraction Services Market Size by Application: 2021 Versus 2025 Versus 2032
  1.6.2 Food & Beverage
  1.6.3 Flavors & Flavors
  1.6.4 Nutrition & Health
  1.6.5 Functional Foods
  1.6.6 Other
1.7 Global Supercritical Extraction Services Market Size & Forecast
1.8 Global Supercritical Extraction Services Market Size and Forecast by Region
  1.8.1 Global Supercritical Extraction Services Market Size by Region: 2021 VS 2025 VS 2032

2.27.2 Supercritical Technology Center Co., Ltd. Major Business
2.27.3 Supercritical Technology Center Co., Ltd. Supercritical Extraction Services Product and Solutions
2.27.4 Supercritical Technology Center Co., Ltd. Supercritical Extraction Services Revenue, Gross Margin and Market Share (2021-2026)
2.27.5 Supercritical Technology Center Co., Ltd. Recent Developments and Future Plans
2.28 TIBD Co., Ltd.
2.28.1 TIBD Co., Ltd. Details
2.28.2 TIBD Co., Ltd. Major Business
2.28.3 TIBD Co., Ltd. Supercritical Extraction Services Product and Solutions
2.28.4 TIBD Co., Ltd. Supercritical Extraction Services Revenue, Gross Margin and Market Share (2021-2026)
2.28.5 TIBD Co., Ltd. Recent Developments and Future Plans
2.29 MSTEM LAB
2.29.1 MSTEM LAB Details
2.29.2 MSTEM LAB Major Business
2.29.3 MSTEM LAB Supercritical Extraction Services Product and Solutions
2.29.4 MSTEM LAB Supercritical Extraction Services Revenue, Gross Margin and Market Share (2021-2026)
2.29.5 MSTEM LAB Recent Developments and Future Plans

3 MARKET COMPETITION, BY PLAYERS

3.1 Global Supercritical Extraction Services Revenue and Share by Players

+357 96 030922
info@marketpublishers.com

(2021-2026)
3.2 Market Share Analysis (2025)
3.2.1 Market Share of Supercritical Extraction Services by Company Revenue
3.2.2 Top 3 Supercritical Extraction Services Players Market Share in 2025
3.2.3 Top 6 Supercritical Extraction Services Players Market Share in 2025
3.3 Supercritical Extraction Services Market: Overall Company Footprint Analysis
3.3.1 Supercritical Extraction Services Market: Region Footprint
3.3.2 Supercritical Extraction Services Market: Company Product Type Footprint
3.3.3 Supercritical Extraction Services Market: Company Product Application Footprint
3.4 New Market Entrants and Barriers to Market Entry
3.5 Mergers, Acquisition, Agreements, and Collaborations

4 MARKET SIZE SEGMENT BY TYPE

4.1 Global Supercritical Extraction Services Consumption Value and Market Share by Type (2021-2026)
4.2 Global Supercritical Extraction Services Market Forecast by Type (2027-2032)

5 MARKET SIZE SEGMENT BY APPLICATION

5.1 Global Supercritical Extraction Services Consumption Value Market Share by Application (2021-2026)
5.2 Global Supercritical Extraction Services Market Forecast by Application (2027-2032)

6 NORTH AMERICA

6.1 North America Supercritical Extraction Services Consumption Value by Type (2021-2032)
6.2 North America Supercritical Extraction Services Market Size by Application (2021-2032)
6.3 North America Supercritical Extraction Services Market Size by Country
6.3.1 North America Supercritical Extraction Services Consumption Value by Country (2021-2032)
6.3.2 United States Supercritical Extraction Services Market Size and Forecast (2021-2032)
6.3.3 Canada Supercritical Extraction Services Market Size and Forecast (2021-2032)
6.3.4 Mexico Supercritical Extraction Services Market Size and Forecast (2021-2032)

7 EUROPE

+357 96 030922
info@marketpublishers.com

7.1 Europe Supercritical Extraction Services Consumption Value by Type (2021-2032)
7.2 Europe Supercritical Extraction Services Consumption Value by Application (2021-2032)
7.3 Europe Supercritical Extraction Services Market Size by Country
7.3.1 Europe Supercritical Extraction Services Consumption Value by Country (2021-2032)
7.3.2 Germany Supercritical Extraction Services Market Size and Forecast (2021-2032)
7.3.3 France Supercritical Extraction Services Market Size and Forecast (2021-2032)
7.3.4 United Kingdom Supercritical Extraction Services Market Size and Forecast (2021-2032)
7.3.5 Russia Supercritical Extraction Services Market Size and Forecast (2021-2032)
7.3.6 Italy Supercritical Extraction Services Market Size and Forecast (2021-2032)

8 ASIA-PACIFIC

8.1 Asia-Pacific Supercritical Extraction Services Consumption Value by Type (2021-2032)
8.2 Asia-Pacific Supercritical Extraction Services Consumption Value by Application (2021-2032)
8.3 Asia-Pacific Supercritical Extraction Services Market Size by Region
8.3.1 Asia-Pacific Supercritical Extraction Services Consumption Value by Region (2021-2032)
8.3.2 China Supercritical Extraction Services Market Size and Forecast (2021-2032)
8.3.3 Japan Supercritical Extraction Services Market Size and Forecast (2021-2032)
8.3.4 South Korea Supercritical Extraction Services Market Size and Forecast (2021-2032)
8.3.5 India Supercritical Extraction Services Market Size and Forecast (2021-2032)
8.3.6 Southeast Asia Supercritical Extraction Services Market Size and Forecast (2021-2032)
8.3.7 Australia Supercritical Extraction Services Market Size and Forecast (2021-2032)

9 SOUTH AMERICA

9.1 South America Supercritical Extraction Services Consumption Value by Type (2021-2032)
9.2 South America Supercritical Extraction Services Consumption Value by Application (2021-2032)

+357 96 030922
info@marketpublishers.com

9.3 South America Supercritical Extraction Services Market Size by Country
9.3.1 South America Supercritical Extraction Services Consumption Value by Country (2021-2032)
9.3.2 Brazil Supercritical Extraction Services Market Size and Forecast (2021-2032)
9.3.3 Argentina Supercritical Extraction Services Market Size and Forecast (2021-2032)

10 MIDDLE EAST & AFRICA

10.1 Middle East & Africa Supercritical Extraction Services Consumption Value by Type (2021-2032)
10.2 Middle East & Africa Supercritical Extraction Services Consumption Value by Application (2021-2032)
10.3 Middle East & Africa Supercritical Extraction Services Market Size by Country
10.3.1 Middle East & Africa Supercritical Extraction Services Consumption Value by Country (2021-2032)
10.3.2 Turkey Supercritical Extraction Services Market Size and Forecast (2021-2032)
10.3.3 Saudi Arabia Supercritical Extraction Services Market Size and Forecast (2021-2032)
10.3.4 UAE Supercritical Extraction Services Market Size and Forecast (2021-2032)

11 MARKET DYNAMICS

11.1 Supercritical Extraction Services Market Drivers
11.2 Supercritical Extraction Services Market Restraints
11.3 Supercritical Extraction Services Trends Analysis
11.4 Porters Five Forces Analysis
11.4.1 Threat of New Entrants
11.4.2 Bargaining Power of Suppliers
11.4.3 Bargaining Power of Buyers
11.4.4 Threat of Substitutes
11.4.5 Competitive Rivalry

12 INDUSTRY CHAIN ANALYSIS

12.1 Supercritical Extraction Services Industry Chain
12.2 Supercritical Extraction Services Upstream Analysis
12.3 Supercritical Extraction Services Midstream Analysis
12.4 Supercritical Extraction Services Downstream Analysis

I would like to order

Product name: Global Supercritical Extraction Services Market 2026 by Company, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G38CB79C76D0EN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G38CB79C76D0EN.html
