Supermarket refrigerated island display cases are open or semi-open refrigerated display units placed in the central area of ??supermarkets and fresh food sections. They are typically arranged in an 'island' shape, allowing customers to retrieve items from all sides. The core value of island display cases lies in solving problems such as insufficient display capacity, frequent restocking, customer congestion, and unstable temperature control in fresh food sections through large-capacity display, 360° visibility, and high retrieval efficiency. They are key equipment for supermarkets to improve fresh food sales and sales per square meter. Supermarket refrigerated island display cases achieve 'high display volume + high accessibility + high turnover' in a single unit, making them a core asset in fresh food retail. The average price of this product is approximately US\$870 per unit, with global sales of approximately 4.6 million units.
