The global Supply Chain Audit Service market size is expected to reach \$ 2072 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Supply Chain Audit Service is an independent assessment activity designed to systematically examine and verify the compliance, risks, and performance of each link in the supply chain, particularly suppliers. It is typically commissioned by the procuring entity to an internal team or a third-party professional organization. Through methods such as document review, site visits, employee interviews, and process observation, it focuses on multiple key areas including quality, environment, social responsibility, business ethics, and business continuity. Its core objective is to identify potential risks in the supply chain (such as violations and disruptions), ensure partners comply with relevant regulations, industry standards, and the procuring entity's own code of ethics, thereby improving supply chain transparency, strengthening risk management, and promoting sustainable and responsible procurement practices.

The global development of Supply Chain Audit Services exhibits significant regional differences. Developed economies such as Europe and the United States have established mature mandatory regulatory systems, and the focus of audits has deepened from traditional social responsibility and quality to compliance across the entire supply chain, including carbon emissions and business ethics. Emerging markets, represented by China, are rapidly shifting from export-oriented, passive audits to proactive supply chain management driven by domestic regulations and 'dual carbon' targets, with widespread application of digital tools. In major manufacturing bases such as Southeast Asia and South Asia, audit services focus on balancing costs and basic compliance to meet international procurement requirements. Overall, the global trend is

shifting from isolated factory certifications to data-driven, dynamic, and transparent supply chain resilience management.

This report studies the global Supply Chain Audit Service demand, key companies, and key regions.
