The global Surface Disinfection Electrostatic Sprayer market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Surface disinfection electrostatic sprayers used for disinfecting surfaces can be effective for disinfecting large areas or equipment that is hard to access by manual. Electrostatic spraying uses electrostatically charged mist to ensure the cleaner, paint, oil, or other liquid being sprayed evenly coats the entire surface. Inside the sprayer there is an electrode that atomizes and positively charges the spray particles, which are then attracted to any surface in their path.
