## Abstracts

The global Surface Protective Film(Adhesive-Substrate-Release Coating Structure) market size is expected to reach \$ 38.28 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

Surface protective film (Adhesive-Substrate-Release Coating Structure) is made of PE, PET or PP film as the substrate. Low or medium adhesive pressure-sensitive adhesive is applied on one side of the substrate for temporary adhesion to the surface of the protected material, and a release coating is applied on the other side to reduce surface energy, so that the protective film can be smoothly peeled off during winding, stacking or die-cutting processes without self adhesion. This type of product is mainly used for temporary surface protection of electronic materials, optical films, metal sheets, plastic sheets, glass panels, and automotive interior and exterior parts during processing, transportation, and storage. It has the characteristics of easy attachment, easy peeling, low residual adhesive, and high surface cleanliness. In 2025, global Surface Protective Film(Adhesive-Substrate-Release Coating Structure) production reached approximately 29,348 K Sqm, with an average global market price of around US\$ 0.85 per Sqm.

The annual production capacity of surface protective film (adhesive substrate release coating structure) is 40,000 K Sqm, with a gross profit margin of about 25%.

The upstream mainly consists of petrochemical raw materials and functional chemical industries, including suppliers of polyethylene, polypropylene, polyester film, acrylic pressure-sensitive adhesive resin, silicon-based release agents, as well as various additives and coating materials; Downstream applications are mainly used in industries such as electronic and display panel manufacturing, metal sheet processing, and plastic

sheet production.

The cost of substrate film accounts for about 40% -55%, while pressure-sensitive adhesive accounts for about 20% -30%; Release coating materials account for about 5% -10%; Coating processing, energy and equipment depreciation account for about 10% -15%; Labor and management costs account for approximately 5% -10%.
