Abstracts

According to our (Global Info Research) latest study, the global Surgical Instrument Repair Service market size was valued at US$ 1770 million in 2025 and is forecast to a readjusted size of US$ 2558 million by 2032 with a CAGR of 5.4% during review period.

Surgical Instrument Repair Service refers to professional inspection, preventive maintenance, functional restoration, repair and refurbishment services for reusable instruments used in surgical procedures. The service primarily addresses general handheld instruments such as surgical scissors, forceps, clamps, needle holders, rongeurs and retractors, together with reusable minimally invasive, microsurgical, ophthalmic, orthopedic and other specialty instruments. Typical technical activities include sharpening, realignment and straightening, jaw and ratchet adjustment, welding or brazing, insert and component replacement, surface restoration, re-insulation, lubrication, performance testing and comprehensive refurbishment. Services may be delivered through centralized repair facilities, regional depots, mobile repair laboratories or embedded on-site technical teams. The core value proposition is to restore instruments to required functional and performance conditions, extend their usable life, reduce replacement expenditure and instrument downtime, and support reliable instrument availability for operating rooms and sterile processing departments. This study focuses on commercially delivered repair activities associated with reusable surgical instruments and analyzes the market by instrument family, service activity, delivery model, provider type, end user and region.

Key Findings

+357 96 030922
info@marketpublishers.com

North America accounted for approximately 44% of 2025 market revenue and remained the largest regional market

The three leading provider groups represented roughly two-fifths of narrow-scope market revenue

The identified global vendor pool exceeds 60 providers, highlighting a highly fragmented long-tail supply structure

General reusable instruments form the core demand base, while minimally invasive and precision instruments require higher-value technical repair

On-site mobile repair and centralized depot repair increasingly operate as complementary service models

Market Trends

Surgical Instrument Repair Service is evolving from basic sharpening and mechanical correction toward broader instrument lifecycle management. Traditional repair activities such as sharpening, alignment, jaw adjustment and component replacement remain fundamental, but customers increasingly expect providers to handle laparoscopic instruments, microsurgical devices, specialty instruments and re-insulation work that requires higher technical precision. At the same time, service delivery is becoming more flexible. Large hospitals and health systems increasingly combine scheduled mobile repair, embedded technical support and centralized depot capabilities to shorten turnaround times and keep instrument sets available for procedures. Leading service organizations are also integrating asset information, repair history and preventive maintenance into their service models, shifting purchasing decisions away from isolated per-item repair toward recurring service relationships. STERIS, for example, publicly describes on-location repair, in-house repair laboratories, regional and national repair centers, as well as digital asset-management support within its instrument service offering. This transition favors providers that can combine technical depth, rapid turnaround, quality documentation and broad geographic coverage.

Market Dynamics

Drivers

+357 96 030922
info@marketpublishers.com

The primary demand driver for Surgical Instrument Repair Service is the large installed base of reusable surgical instruments that experience progressive mechanical wear during repeated clinical use and reprocessing cycles. Scissors lose cutting performance, forceps and needle holders develop alignment or ratchet issues, and specialty instruments may require component or insulation restoration over time. Professional repair can extend useful instrument life and reduce the need for premature replacement, creating a clear economic incentive for hospitals facing operating-room cost pressure and increasing procedure volumes. STERIS notes that regular maintenance and repair are required to maintain instrument functionality and can address sharpening, alignment, insert replacement and other forms of wear, while Agiliti positions repair as a means of extending useful life and reducing operating-room service costs. Growth in ambulatory surgery, minimally invasive procedures and high-value specialty instrument inventories further increases the commercial value of timely repair and preventive maintenance.

Restraints

Market expansion is constrained by the economics of replacement for lower-value instruments and by the growing use of disposable or single-use products in selected procedures. Where replacement instruments are inexpensive, repair costs, logistics and downtime can make direct replacement more attractive than refurbishment. The service market is also labor intensive and dependent on experienced technicians capable of restoring fine mechanical tolerances without compromising instrument performance. This limits rapid capacity expansion and creates regional differences in service quality. Another structural restraint is the heterogeneous nature of instrument inventories: hospitals may operate products from numerous manufacturers, specialties and generations, requiring providers to maintain broad technical knowledge and repair capability. In addition, complex instruments may need to be transferred from local mobile teams to centralized specialist facilities, increasing turnaround time. These factors prevent repair from becoming a fully standardized commodity service and favor providers that can maintain sufficient repair volume, technical specialization and quality control to achieve attractive operating economics.

Opportunities

The largest opportunities lie in higher-value repair categories and managed service models rather than simple commodity sharpening. Minimally invasive, microsurgical, ophthalmic and specialty instruments typically demand greater precision and can carry

+357 96 030922
info@marketpublishers.com

substantially higher replacement value, improving the economics of professional repair. Hospitals also represent an opportunity for broader preventive maintenance programs in which instruments are inspected systematically before significant deterioration leads to emergency replacement or procedure disruption. Mobile laboratories and embedded service teams can increase repair frequency and strengthen customer retention by bringing technicians closer to sterile processing departments. Emerging markets provide an additional opportunity as reusable instrument inventories expand and hospitals develop more structured maintenance practices. Sustainability considerations also strengthen the long-term value proposition because extending the usable life of existing instruments can reduce material consumption and replacement demand. The market therefore offers room for providers that can move beyond transactional repair toward lifecycle management combining inspection, preventive maintenance, rapid repair, documentation and inventory-related support.

Challenges

The industry's principal challenge is maintaining consistent repair quality across a very broad range of instrument designs while controlling turnaround time and service cost. Repairs must restore instrument performance without materially altering safety specifications or intended use, making technical process control particularly important for complex or specialty work. In the United States, the FDA has clarified the distinction between servicing and remanufacturing: servicing is intended to return a device to the safety and performance specifications established by the original manufacturer, whereas activities that significantly change performance, safety specifications or intended use may constitute remanufacturing and carry different regulatory implications. This reinforces the importance of technician competence, repair documentation and clear process boundaries. At the same time, fragmented regional competition can create pricing pressure, while shortages of experienced repair technicians may limit scalability. Providers must therefore balance technical breadth, compliance discipline, turnaround performance and competitive pricing without compromising service quality.

Value Chain Analysis

The value chain of Surgical Instrument Repair Service begins with instrument manufacturers, component and insert suppliers, specialty tooling providers, repair consumables and technical training resources. These inputs support the central service layer, where OEM service organizations, independent third-party repair providers, manufacturer-repair hybrids and regional specialists perform inspection, sharpening,

+357 96 030922
info@marketpublishers.com

alignment, welding, component replacement, re-insulation, functional testing and refurbishment. Value creation is concentrated in skilled labor, diagnostic capability, repair process knowledge, logistics efficiency and quality assurance rather than in raw materials. For routine hand instruments, labor productivity and mobile-service density are important economic variables; for microsurgical and minimally invasive instruments, specialized technical expertise and precision processes account for a larger share of service value.

Downstream customers include hospitals, ambulatory surgery centers, specialty surgical facilities and sterile processing organizations. Instruments typically flow from operating rooms through cleaning and sterile processing, where defects are identified and repair decisions are initiated. Providers then perform repairs either on-site or at regional and central facilities before instruments return to clinical inventory. The highest-value providers increasingly connect these steps through preventive maintenance schedules, repair histories, instrument tracking and contract-based service management. This changes the economics from individual repair transactions toward recurring account relationships, where turnaround time, asset availability, technical quality and reduced replacement spending become key sources of customer value.

Segment Insights

By instrument family, general reusable surgical instruments represent the broadest demand base because scissors, clamps, forceps, needle holders, retractors and related stainless-steel instruments are used across a wide range of procedures and require recurring sharpening, adjustment and mechanical restoration. However, minimally invasive, microsurgical, ophthalmic and other specialty instruments typically generate higher repair value per service event because of greater mechanical complexity, tighter tolerances and higher replacement costs. As procedural techniques become more specialized, the value contribution of these technically demanding categories is expected to rise even though general instruments continue to account for the largest volume of repair activity. Providers with expertise across both routine and specialty instruments are therefore better positioned to consolidate hospital repair spending.

By delivery model, on-site and mobile repair have gained strategic importance because they reduce transportation time and can return routine instruments to service rapidly, while centralized depot repair remains essential for complex procedures requiring specialist equipment or deeper refurbishment. Agiliti publicly describes nationwide on-site surgical instrument repair supplemented by centralized Centers of Excellence for more complex work, while STERIS similarly combines on-location service with regional

+357 96 030922
info@marketpublishers.com

and national repair centers. Hybrid service models are therefore becoming increasingly important for larger hospital systems seeking both immediate turnaround and access to advanced repair capabilities.

Downstream Market Opportunities

Hospitals remain the primary downstream opportunity because they operate the largest reusable instrument inventories and face continuous pressure to maintain procedure-ready sets while controlling replacement expenditure. Sterile processing departments are particularly influential in repair purchasing because they identify instrument wear, coordinate tray availability and manage the flow of instruments between procedures. Ambulatory surgery centers and specialty surgical facilities represent another attractive opportunity as outpatient procedures expand and facilities seek to operate leaner inventories with limited tolerance for instrument downtime. The strongest commercial opportunities are likely to occur where repair directly prevents costly replacement or operational disruption, particularly in minimally invasive, orthopedic, ophthalmic and microsurgical applications. Providers that can offer scheduled inspection, rapid mobile service, specialty depot capability and transparent repair documentation can address these needs more effectively than suppliers focused solely on ad hoc sharpening or basic mechanical work.

Regional Insights

North America remained the largest regional Surgical Instrument Repair Service market in 2025, contributing approximately 44% of global narrow-scope revenue in the study model. The region combines a large installed base of reusable instruments with mature outsourcing practices, extensive hospital networks and a well-developed independent repair ecosystem. Mobile repair is particularly established in the United States, allowing larger providers to serve hospital systems through recurring on-site programs while directing complex work to centralized facilities. Europe represented the second-largest regional market, with Germany and the United Kingdom benefiting from long-established surgical instrument manufacturing and repair capabilities. The European market has a comparatively strong presence of manufacturers that combine instrument production with technical repair services.

Asia-Pacific is more fragmented and presents a different growth profile. Japan has an established specialist ecosystem for steel and precision surgical instruments, while China remains less consolidated, with regional repair businesses and broader medical-

+357 96 030922
info@marketpublishers.com

equipment service companies gradually developing dedicated surgical instrument capabilities. Australia and New Zealand support several established independent specialists, whereas India combines instrument manufacturing with repair and refurbishment activities. These structural differences create opportunities for consolidation, standardized quality systems and broader service networks in emerging markets, while mature regions are more likely to grow through managed service penetration, higher-value specialty repair and acquisition-led consolidation.

Competitive Landscape Analysis

The global Surgical Instrument Repair Service market has a two-tier competitive structure in which a small group of scaled service organizations operates alongside a much larger population of regional and specialty providers. STERIS, Agiliti and B. Braun/Aesculap occupy prominent positions because of their broad service infrastructure, hospital relationships and technical capabilities, while companies such as Surgical Instrument Service Company, BPI Medical, MEDICON, FiberTech Medical, Pacific Surgical Holdings, MultiMedical Systems, US Medical Systems and Uniplex strengthen competition at the national or regional level. The market remains considerably more fragmented by company count than by revenue, and regional providers can retain meaningful positions through faster response, specialty expertise and close relationships with sterile processing departments. Scale nevertheless provides advantages in mobile technician coverage, centralized specialist facilities, quality systems and multi-site hospital contracting. Consolidation remains relevant: STILLE completed its acquisition of Surgical Holdings in August 2025, adding a UK surgical instrument repair operation to its broader surgical-instrument business. Over time, competitive advantage is expected to shift further toward providers that combine technical repair capability with preventive maintenance, lifecycle data, rapid turnaround and multi-facility service management.

Report Scope

This report is a detailed and comprehensive analysis for global Surgical Instrument Repair Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share

+357 96 030922
info@marketpublishers.com

estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Surgical Instrument Repair Service market size and forecasts, in consumption value ($ Million), 2021-2032

Global Surgical Instrument Repair Service market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global Surgical Instrument Repair Service market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global Surgical Instrument Repair Service market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Surgical Instrument Repair Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Surgical Instrument Repair Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include STERIS plc, Agiliti, Inc., B. Braun SE, Surgical Instrument Service Company, BPI Medical, MEDICON eG, FiberTech Medical, Pacific Surgical Holdings Ltd., MultiMedical Systems, US Medical Systems, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

+357 96 030922
info@marketpublishers.com

Surgical Instrument Repair Service market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by regions, regional analysis covers

North America (United States, Canada and Mexico)

Europe (Germany, France, UK, Russia, Italy and Rest of Europe)

Asia-Pacific (China, Japan, South Korea, India, Southeast Asia and Rest of Asia-Pacific)

South America (Brazil, Rest of South America)

Middle East & Africa (Turkey, Saudi Arabia, UAE, Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Surgical Instrument Repair Service product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Surgical Instrument Repair Service, with revenue, gross margin, and global market share of Surgical Instrument Repair Service from 2021 to 2026.

Chapter 3, the Surgical Instrument Repair Service competitive situation, revenue, and global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and by Application, with consumption value and growth rate by Type, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026.and Surgical Instrument Repair Service market forecast, by regions, by Type and by Application, with consumption value, from 2027 to 2032.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis.

Chapter 12, the key raw materials and key suppliers, and industry chain of Surgical Instrument Repair Service.

+357 96 030922
info@marketpublishers.com

Chapter 13, to describe Surgical Instrument Repair Service research findings and conclusion.

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Classification of Surgical Instrument Repair Service by Type
  1.3.1 Overview: Global Surgical Instrument Repair Service Market Size by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Global Surgical Instrument Repair Service Consumption Value Market Share by Type in 2025
  1.3.3 General Reusable Surgical Instruments
  1.3.4 Minimally Invasive Surgical Instruments
  1.3.5 Microsurgical Instruments
  1.3.6 Ophthalmic Surgical Instruments
  1.3.7 Orthopedic Surgical Instruments
  1.3.8 Others
1.4 Classification of Surgical Instrument Repair Service by Service Delivery Model
  1.4.1 Overview: Global Surgical Instrument Repair Service Market Size by Service Delivery Model: 2021 Versus 2025 Versus 2032
  1.4.2 Global Surgical Instrument Repair Service Consumption Value Market Share by Service Delivery Model in 2025
  1.4.3 Mobile Repair
  1.4.4 Off-site Repair
  1.4.5 Embedded Vendor-managed Service
  1.4.6 Others
1.5 Classification of Surgical Instrument Repair Service by Commercial Model
  1.5.1 Overview: Global Surgical Instrument Repair Service Market Size by Commercial Model: 2021 Versus 2025 Versus 2032
  1.5.2 Global Surgical Instrument Repair Service Consumption Value Market Share by Commercial Model in 2025
  1.5.3 Per-instrument Repair
  1.5.4 Per-set Service
  1.5.5 Time and Materials
  1.5.6 Others
1.6 Global Surgical Instrument Repair Service Market by Application
  1.6.1 Overview: Global Surgical Instrument Repair Service Market Size by Application: 2021 Versus 2025 Versus 2032
  1.6.2 Hospitals

2.27.3 Guangdong Runkai Medical Technology Co., Ltd. Surgical Instrument Repair Service Product and Solutions
2.27.4 Guangdong Runkai Medical Technology Co., Ltd. Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
2.27.5 Guangdong Runkai Medical Technology Co., Ltd. Recent Developments and Future Plans
2.28 Vear Surgical
2.28.1 Vear Surgical Details
2.28.2 Vear Surgical Major Business
2.28.3 Vear Surgical Surgical Instrument Repair Service Product and Solutions
2.28.4 Vear Surgical Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
2.28.5 Vear Surgical Recent Developments and Future Plans
2.29 Tanaka Medical Instruments
2.29.1 Tanaka Medical Instruments Details
2.29.2 Tanaka Medical Instruments Major Business
2.29.3 Tanaka Medical Instruments Surgical Instrument Repair Service Product and Solutions
2.29.4 Tanaka Medical Instruments Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
2.29.5 Tanaka Medical Instruments Recent Developments and Future Plans

2.30 Guangzhou Chuangyi Medical Technology CO.,Ltd
2.30.1 Guangzhou Chuangyi Medical Technology CO.,Ltd Details
2.30.2 Guangzhou Chuangyi Medical Technology CO.,Ltd Major Business
2.30.3 Guangzhou Chuangyi Medical Technology CO.,Ltd Surgical Instrument Repair Service Product and Solutions
2.30.4 Guangzhou Chuangyi Medical Technology CO.,Ltd Surgical Instrument Repair Service Revenue, Gross Margin and Market Share (2021-2026)
2.30.5 Guangzhou Chuangyi Medical Technology CO.,Ltd Recent Developments and Future Plans

3 MARKET COMPETITION, BY PLAYERS

3.1 Global Surgical Instrument Repair Service Revenue and Share by Players (2021-2026)
3.2 Market Share Analysis (2025)
3.2.1 Market Share of Surgical Instrument Repair Service by Company Revenue
3.2.2 Top 3 Surgical Instrument Repair Service Players Market Share in 2025
3.2.3 Top 6 Surgical Instrument Repair Service Players Market Share in 2025
3.3 Surgical Instrument Repair Service Market: Overall Company Footprint Analysis
3.3.1 Surgical Instrument Repair Service Market: Region Footprint
3.3.2 Surgical Instrument Repair Service Market: Company Product Type Footprint
3.3.3 Surgical Instrument Repair Service Market: Company Product Application Footprint
3.4 New Market Entrants and Barriers to Market Entry
3.5 Mergers, Acquisition, Agreements, and Collaborations

4 MARKET SIZE SEGMENT BY TYPE

4.1 Global Surgical Instrument Repair Service Consumption Value and Market Share by Type (2021-2026)
4.2 Global Surgical Instrument Repair Service Market Forecast by Type (2027-2032)

5 MARKET SIZE SEGMENT BY APPLICATION

5.1 Global Surgical Instrument Repair Service Consumption Value Market Share by Application (2021-2026)
5.2 Global Surgical Instrument Repair Service Market Forecast by Application (2027-2032)

+357 96 030922
info@marketpublishers.com

6 NORTH AMERICA

6.1 North America Surgical Instrument Repair Service Consumption Value by Type (2021-2032)
6.2 North America Surgical Instrument Repair Service Market Size by Application (2021-2032)
6.3 North America Surgical Instrument Repair Service Market Size by Country
  6.3.1 North America Surgical Instrument Repair Service Consumption Value by Country (2021-2032)
  6.3.2 United States Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
  6.3.3 Canada Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
  6.3.4 Mexico Surgical Instrument Repair Service Market Size and Forecast (2021-2032)

7 EUROPE

7.1 Europe Surgical Instrument Repair Service Consumption Value by Type (2021-2032)
7.2 Europe Surgical Instrument Repair Service Consumption Value by Application (2021-2032)
7.3 Europe Surgical Instrument Repair Service Market Size by Country
  7.3.1 Europe Surgical Instrument Repair Service Consumption Value by Country (2021-2032)
  7.3.2 Germany Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
  7.3.3 France Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
  7.3.4 United Kingdom Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
  7.3.5 Russia Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
  7.3.6 Italy Surgical Instrument Repair Service Market Size and Forecast (2021-2032)

8 ASIA-PACIFIC

8.1 Asia-Pacific Surgical Instrument Repair Service Consumption Value by Type (2021-2032)

+357 96 030922
info@marketpublishers.com

8.2 Asia-Pacific Surgical Instrument Repair Service Consumption Value by Application (2021-2032)
8.3 Asia-Pacific Surgical Instrument Repair Service Market Size by Region
8.3.1 Asia-Pacific Surgical Instrument Repair Service Consumption Value by Region (2021-2032)
8.3.2 China Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
8.3.3 Japan Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
8.3.4 South Korea Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
8.3.5 India Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
8.3.6 Southeast Asia Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
8.3.7 Australia Surgical Instrument Repair Service Market Size and Forecast (2021-2032)

9 SOUTH AMERICA

9.1 South America Surgical Instrument Repair Service Consumption Value by Type (2021-2032)
9.2 South America Surgical Instrument Repair Service Consumption Value by Application (2021-2032)
9.3 South America Surgical Instrument Repair Service Market Size by Country
9.3.1 South America Surgical Instrument Repair Service Consumption Value by Country (2021-2032)
9.3.2 Brazil Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
9.3.3 Argentina Surgical Instrument Repair Service Market Size and Forecast (2021-2032)

10 MIDDLE EAST & AFRICA

10.1 Middle East & Africa Surgical Instrument Repair Service Consumption Value by Type (2021-2032)
10.2 Middle East & Africa Surgical Instrument Repair Service Consumption Value by Application (2021-2032)
10.3 Middle East & Africa Surgical Instrument Repair Service Market Size by Country
10.3.1 Middle East & Africa Surgical Instrument Repair Service Consumption Value by Country (2021-2032)
10.3.2 Turkey Surgical Instrument Repair Service Market Size and Forecast (2021-2032)

+357 96 030922
info@marketpublishers.com

10.3.3 Saudi Arabia Surgical Instrument Repair Service Market Size and Forecast (2021-2032)
10.3.4 UAE Surgical Instrument Repair Service Market Size and Forecast (2021-2032)

11 MARKET DYNAMICS

11.1 Surgical Instrument Repair Service Market Drivers
11.2 Surgical Instrument Repair Service Market Restraints
11.3 Surgical Instrument Repair Service Trends Analysis
11.4 Porters Five Forces Analysis
11.4.1 Threat of New Entrants
11.4.2 Bargaining Power of Suppliers
11.4.3 Bargaining Power of Buyers
11.4.4 Threat of Substitutes
11.4.5 Competitive Rivalry

12 INDUSTRY CHAIN ANALYSIS

12.1 Surgical Instrument Repair Service Industry Chain
12.2 Surgical Instrument Repair Service Upstream Analysis
12.3 Surgical Instrument Repair Service Midstream Analysis
12.4 Surgical Instrument Repair Service Downstream Analysis

13 RESEARCH FINDINGS AND CONCLUSION

14 APPENDIX

14.1 Methodology
14.2 Research Process and Data Source
14.3 Disclaimer
