Abstracts

The global Surgical Robotics market size is expected to reach \$ 13220 million by 2032, rising at a market growth of 15.2% CAGR during the forecast period (2026-2032).

Surgical robot can be controlled through computer program to assist surgery. A surgical robot allows surgeons greater access to areas under operation using more precise and less invasive methods. Surgical robots can assist surgery like Laparoscopy, Orthopedics, Neurology, etc.

The surgical robotics market is driven by the increasing demand for minimally invasive surgeries, which offer benefits such as reduced recovery time, smaller incisions, and fewer complications compared to traditional surgical methods. Robotic systems provide surgeons with enhanced precision, flexibility, and control, enabling complex procedures to be performed with greater accuracy. Technological advancements in robotics, including improved imaging, haptic feedback, and AI integration, have further boosted the adoption of surgical robots in a variety of specialties such as orthopedics, urology, and neurology. The growing aging population and rising incidence of chronic diseases also contribute to the market's expansion.

A major challenge for the surgical robotics market is the high cost associated with robotic systems, including purchase, maintenance, and training expenses. These costs can be prohibitive, especially for smaller hospitals and healthcare providers, limiting the widespread adoption of robotic surgery. Additionally, the learning curve for surgeons to effectively operate these complex systems can be steep, requiring significant time and resources for training. Regulatory approvals and concerns over patient safety and data privacy with robotic-assisted surgeries are other factors that may slow market growth, as thorough clinical validation is needed to gain wider acceptance.

In North American market, the leading manufactures mainly are Intuitive Surgical, Stryker, Mazor Robotics, Medtech S.A and THINK Surgical. Intuitive Surgical is the largest manufacturer, its accounts for over 70% of market. The next is Stryker, Medtronic.
