Abstracts

According to our (Global Info Research) latest study, the global Surround Sound Processors market size was valued at USD 198.8 million in 2023 and is forecast to a readjusted size of USD 305.8 million by 2030 with a CAGR of 6.3% during review period.

Surround sound processors are the brains of all mid to high end home theater systems. They are similar to AV receivers in that they provide source switching and decoding, audio/video processing and volume control for various surround sound formats. But unlike an AV receiver, a preamp/AV processor has no built-in amplification and is dedicated to serving as the 'brain' of the system. This means they generally have more processing power available. Includes additional channels, flexible adjustment and calibration options. They also cost more because higher quality components must be included to improve performance.

Global key players of surround sound processors include Sound United (Masimo), Premium Audio (VOXX), Harman (Samsung), etc. The top five players hold a share nearly 70%. Asia-Pacific is the largest market, has a share approximately 42%, followed by North America and Europe, with share about 30% and 25%, separately.

The Global Info Research report includes an overview of the development of the Surround Sound Processors industry chain, the market status of Home Theater (Less than 8, 8-16), Car Audio (Less than 8, 8-16), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Surround Sound Processors.
