According to our (Global Info Research) latest study, the global Surveillance and Security Equipment market size was valued at USD 57990 million in 2023 and is forecast to a readjusted size of USD 96470 million by 2030 with a CAGR of 7.5% during review period.

Surveillance and security equipment is used for monitoring activities and behavior of individuals in areas such as airports, sea ports, railway stations, enterprises, educational institutions, retail stores, and banks that are susceptible to security threats. Proper surveillance in these areas helps reduce the occurrence of terrorist attacks and data theft. The footage and other information captured by the surveillance equipment are transmitted across the network and stored for future use. The installation of surveillance devices at various points reduces the need for security agents.

The global market demand for security & surveillance equipment is rapidly increasing, owing to increasing criminal activities and a rising concern for safety and supervision. Major drivers for the growth of this market are government involvement and initiatives, integration of physical security with surveillance equipment, development of high definition and megapixels driving camera markets, evaluation of smart homes and organizations, a growing demand for advanced security & surveillance system and improvements in data storage like cloud or network storage and data storage systems. On the other hand, lack of standardization, high cost of cloud storage services, privacy concerns, limited availability of skilled professionals and high initial cost restrains the growth of this market.
