According to our (Global Info Research) latest study, the global SUS-AI-alloy Clad Metals market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Clad metals are materials composed of two or more different types of metal. They are high functionality metal materials that possess composite properties that cannot be obtained from single materials. As clad metals are diffusion bonded (i.e. alloyed via elemental diffusion) at the boundary surfaces between the different metals, there is less chance that they will peel off like plating. Clad metals can help reduce total costs by allowing you to eliminate processes, increase quality, reduce lead time, and make other improvements.

In China, the key SUS-AI-alloy Clad Metals manufacturers are Zhongse Composite Material, Tongyi Metal Material Development, Yinbang, Copper Xin Composite Material Technology, Jin Hua Ning Thai metal, Jinnuo Composite Materials, Yuguang Clad Metal Materials, Huayuan New Composite Materials, Tellable Composite Materials, Forhome Composite Materials etc. Top 5 companies occupied about 38% market share.
