Abstracts

A Suspended Electromagnet provides tramp metal collection from conveyed materials. The electromagnet is typically mounted or suspended over a conveyor belt to remove large pieces of tramp metal that represent a hazard to downstream crushers, mills, pulverizers and grinders. Suspended electromagnets also remove sharp metal that can damage or tear expensive conveyor belts, especially at transfer points. Product purity is enhanced with the separation power of the suspended electromagnet.

According to our (Global Info Research) latest study, the global Suspended Electromagnets market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
