Abstracts

The global Suspension Clamps market size is expected to reach $ 1675 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Suspension clamps are overhead-line clamping devices installed at tangent towers, small-angle towers, poles and support points to suspend and support conductors, earth wires, OPGW, ADSS, covered conductors and ABC cables. They carry conductor weight, wind load, ice load and operating vibration while reducing bending stress and abrasion at the support point. Typical products include bolted suspension clamps, saddle-type suspension clamps, cushioned suspension clamps, preformed suspension clamps, optical-cable suspension clamps and ABC suspension clamps. Key upstream materials include aluminum alloy, ductile iron, forged steel, galvanized steel, stainless steel, elastomeric inserts, engineering plastics and high-strength fasteners. Main downstream uses include transmission lines, distribution networks, utility optical-cable routes, renewable-energy export lines and grid refurbishment projects.

In 2025, global suspension clamps production reached approximately 45 million units, with an average global market price is $25 per unit.
