Abstracts

Swine health is associated with the diseases caused due to pigs and the development of therapeutics to prevent the related ailments and disorders. Pig breeding can lead to many diseases such as reproductive disease and congenital malformations. Hence, governmental organizations are launching programs to protect and enhance the health of swine, which reduces the effect of swine diseases on humans.

Scope of the Report:

This report studies the Swine Healthcare market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Swine Healthcare market by product type and applications/end industries.

The increasing demand for livestock products on a global level will drive the growth prospects for the global swine health market during the predicted period. The adoption rate of antibiotics, vaccines, and other treatments is anticipated to grow with the increasing number of initiatives taken by government and vendors to prevent any zoonotic disease from affecting livestock production. Since the production of quality livestock products is dependent on the health of the animal, many vendors are increasingly adopting more number of drugs to prevent and treat diseases of swine. The above two factors will boost the demand for drugs, antibiotics, and vaccines, which, in turn, will propel the rate of revenue generation in the market.

The growing awareness regarding swine health-related products and drugs in the Middle East and Africa about swine health has led to a surge in the growth of the market

segment. Countries such as South Africa, Kenya, and Zambia pose a high risk for developing disease outbreaks amongst its swine population, which is expected to result in an increased demand for antibiotics and vaccines. Also, vendors are devising new product development strategies to address the unmet needs in the market. APAC is both the largest and the fastest growing segment of the swine health market, due to the swift growth in demand for livestock products and of swine farming in China.

The global Swine Healthcare market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.
