In electrical engineering, a synchronous condenser (sometimes called a synchronous capacitor or synchronous compensator) is a device, identical to a synchronous motor, whose shaft is not connected to anything but spins freely.

Scope of the Report:

This report focuses on the Synchronous Condenser in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Synchronous condenser industry has high technology barrier and is technology intensive industry. Currently, there are several producing companies in the world synchronous condenser industry. The main market players are Siemens, GE, Eaton, ABB, Voith and WEG. The production of synchronous condenser will increase to 262 M Var in 2017 from 180 M Var in 2012 with average growth rate of 27.55%.

North America and Europe are the main production regions and consumption regions. The synchronous condenser is mainly applied in long distance power transmission of large-scale power plants.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents increasing trend according to the economy development status and international competition. Also, there is fluctuation in gross margin.

The worldwide market for Synchronous Condenser is expected to grow at a CAGR of roughly 26.7% over the next five years, will reach 51 million US\$ in 2023, from 12 million US\$ in 2017, according to a new GIR (Global Info Research) study.
