## Abstracts

Synthetic-based drilling fluid (SBM) (also known as low-toxic oil-based mud, English abbreviation: LTOBM): Synthetic-based drilling fluid is a drilling fluid that uses synthetic oil as the mixing base. It is generally used for offshore drilling, because as an oil-based mud, its liquid combustion is less toxic than oil-based mud. This is especially important when workers are working in a closed environment. The same environmental and core contamination issues arise when working with rock samples.

According to our (Global Info Research) latest study, the global Synthetic Base Drilling Fluid (SBM) market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
