Spinning industries provide yarn to the weaving industries, which provide fabric to the garment industries. The quality of yarn and fabrics greatly influences the quality of the garments. Quality yarn production greatly depends on machinery. The major players in spinning machinery manufacturing are Switzerland, Germany, Japan, Italy, China and India. However Spain, Belgium, Turkey, and France are growing their market share slowly. Switzerland is a master of finely engineered textile spinning machines.

According to our research, the global spinning machinery market to grow steadily during the forecast period. This industry research report identifies the growth of the technical textile market to be one of the major factors that will have a positive impact on the growth of this market in the spinning machines coming years. Primarily used for technical performances and functional properties, technical textiles have found major significance in several industrial sectors including automotive, construction, healthcare, protective clothing, agriculture, sports equipment, and environmental protection. With the economic growth of several countries across the globe and the growth of the construction sector, the demand for technical textiles will continue to increase in the coming years, consequently propelling the demand for spinning machinery.

According to this market research and analysis, APAC accounted for the major revenue

and dominated the spinning machinery market. The presence of a number of manufacturers who offer a wide range of products in China and the availability of cheap labor in India are some of the major reasons fueling the growth of the textile industry in this region, which will consequently aid in the growth of the market. Analysts predict that the region will continue to dominate the market throughout the predicted period as well and China, India, Vietnam, Pakistan, Bangladesh, and Indonesia will be the major revenue generating countries.
