Abstracts

According to our (Global Info Research) latest study, the global T-glass Cloth market size was valued at USD 78 million in 2022 and is forecast to a readjusted size of USD 105 million by 2029 with a CAGR of 4.3% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

T glass contains a higher percentage of silica (SiO₂) and alumina (Al₂O₃) than general-purpose E glass used for composite materials. As a result, its fiber displays highly advanced mechanical and thermal performance. Like carbon, aramid, and other fibers, T glass is efficient as reinforcement for advanced composite materials and is used by itself or as a hybrid with carbon fiber in aerospace and sports. T glass is also used in high-performance electronic materials for its low thermal expansion and high tensile elasticity.
