## Abstracts

A tablet touch panel is a piece of equipment that lets users to interact with a tablet by touching the screen directly. Incorporating features into the monitor like sensors that detect touch actions makes it possible to issue instructions to a tablet PC by having it sense the position of a finger or stylus. Essentially, it becomes a device fusing the two functions of display and input.

Scope of the Report:

This report focuses on the Tablet Touch Panel in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the tablet PC market, brands, whether they are high end like Apple and Samsung or low-end like the white box makers in China, are introducing products for different segments. Display sizes range from 5" to 12".

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Technology and cost are two major problems.

Although Tablet Touch Panel brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

The worldwide market for Tablet Touch Panel is expected to grow at a CAGR of roughly 13.6% over the next five years, will reach 15800 million US\$ in 2023, from 8390 million US\$ in 2017, according to a new GIR (Global Info Research) study.
