## Abstracts

The food and beverage industry is focusing on replacing sugar with sugar substitutes. This is creating a cost-cutting advantage for production. This is because, when compared with sugar, these substitutes are required in lesser quantities for the same sweet taste. This has accelerated the demand for sweeteners. Low-intensity sweeteners (LIS) can be consumed by people with diabetes. The lower calorie value of LIS controls insulin secretion, which in turn controls the blood sugar level. The demand for LIS is increasing in North America and is driving the sales of sweeteners.

Scope of the Report:

This report focuses on the Tabletop and Sachet Sweeteners in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The growing cases of diabetes and obesity across the globe is one of the primary growth factors for this market. Obesity and diabetes are lifestyle disorders that are predominant in a large segment of the world's population. These disorders lead to other health issues, including heart ailments, respiratory disorders, and anxiety. This high rate of obesity and diabetes will lead to a shift in consumer preference for sachet sweeteners, subsequently fueling market growth.

North America is expected to be the major revenue contributor to the natural sweeteners market by 2023. The increasing demand for high-intensity sweeteners (HIS) from major end-user segments and the increasing demand for low-intensity sweeteners (LIS) from households are the prominent drivers for the market's growth in this region.

Additionally, individuals in this region have better awareness of the benefits of stevia, such as its zero side-effects and zero-calorie properties and are, therefore, switching from artificial sweeteners to stevia.

The worldwide market for Tabletop and Sachet Sweeteners is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
