Abstracts

The global Tafasitamab market size is expected to reach \$ 812 million by 2032, rising at a market growth of 11.5% CAGR during the forecast period (2026-2032).

Tafasitamab is a humanized CD19-targeted monoclonal antibody primarily used in the treatment of B-cell malignancies. It specifically binds to the CD19 antigen expressed on the surface of B cells, inducing antibody-dependent cellular cytotoxicity (ADCC) and other immune-mediated mechanisms, thereby promoting the elimination of malignant B cells. Tafasitamab is typically used in combination with immunomodulatory agents such as lenalidomide for patients with relapsed or refractory diffuse large B-cell lymphoma (DLBCL). It has significant clinical value in the field of hematologic cancer targeted therapy. In 2025, global production of tafasitamab reached approximately 150,000 units.

Tafasitamab, as a CD19-targeted monoclonal antibody, occupies an important niche in the treatment market for B-cell non-Hodgkin lymphoma, particularly in relapsed or refractory diffuse large B-cell lymphoma (R/R DLBCL). With the steady increase in the global incidence of hematologic malignancies and the growing demand for novel immuno-targeted therapies, the CD19-targeted drug market is gradually expanding. Tafasitamab has demonstrated clinical efficacy in combination with lenalidomide, enabling it to gain guideline recommendations and improve its clinical penetration. From a competitive landscape perspective, this field is not only dominated by long-established CD20 monoclonal antibodies such as rituximab, but also faces competitive pressure from emerging CD19/CD79b-targeted therapies. Looking ahead, with the accumulation of real-world evidence, expansion of indications, and commercialization in emerging markets, the market size of tafasitamab is expected to maintain steady growth, continuing to play an important role in the precision treatment landscape of B-cell lymphoma.

This report studies the global Tafasitamab production, demand, key manufacturers, and key regions.
