According to our (Global Info Research) latest study, the global Talent Acquisition Software market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Talent acquisition is the process of finding and acquiring skilled workforce as per the requirements in organizations. Talent acquisition team of HR department is responsible for searching, acquiring, assessing, and hiring candidates that will fit organizational goal and project requirements. Talent acquisition software helps organizations in leveraging video, social, and mobile technologies for managing talent lifecycle. This lifecycle includes the development of talent pools, integrating marketing automation tools, screening of applicants, and on-boarding of applicants.

With digitalization of talent acquisition solutions, companies can post jobs on the internet and receive hundreds of applications in a few minutes. However, there are some shortcomings from ATS. Many unqualified candidates apply, making it hard for employers to find qualified candidates. Also, candidate pools are limited to active candidates, who actively apply for jobs, not including passive candidates, who are not actively looking for jobs but open to other opportunities. Passive candidates account for 75% of the workforce, so it is important to reach out to them to hire the best candidates.
