Tamper resistant labels are security labels that can detect unauthorized access to any protected object. Tamper resistant labels have self-adhesive material at the base and make use of frangible face material. When tampered, it is not possible to re-apply these labels and the amount of damage done to the face material of tamper resistant labels serves as indicator that the protected product is damaged or tampered with.

Various technologies are used in tamper resistant labels, such as RFID tags, barcode and NFC tags. Tamper resistant labels are widely used across pharmaceutical industry, automotive, food and beverage and transport among others.
