Abstracts

Chemical tankers transport an enormous variety of chemical and oil products in global and short sea trade. Due to this variety the next cargo is almost never identical with the previous cargo. Thus tank cleaning is essential on chemical and product tankers.

Scope of the Report:

This report studies the Tank Cleaning Service market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Tank Cleaning Service market by product type and applications/end industries.

The usable tank capacity is reduced by the volume of sludge. The tank operator needs then to clean the tank in order to re-establish its full capacity. In addition to this, national inspection regulations require a leak test every five or 10 years (double floor). To perform this inspection, the tank needs to be completely drained and cleaned. Repair work is often performed on this occasion. The petrochemical industry and tank terminals are increasingly choosing the option of automated rather than manual tank cleaning.

One trend in the market is increasing market for tank cleaning systems as a service. Tank Cleaning Systems that not only clean the tank from inside but also extract hydrocarbons from the sludge have high upfront costs.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Mideast regions.

The global Tank Cleaning Service market is valued at 470 million USD in 2017 and is

expected to reach 580 million USD by the end of 2023, growing at a CAGR of 3.8% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Tank Cleaning Service.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
