Abstracts

Tank gauge systems for fueling stations are devices that aid in day-to-day operations by monitoring the fuel tank inventory levels, raising the alarm in case problems arise in the tank, and performing leak tests as per the environmental regulations. The use of tank gauge systems increases the efficiency of fueling stations. The device analyzes the entire operations of the fueling station and highlights all the inefficiencies.

SCOPE OF THE REPORT:

This report focuses on the Tank Gauge Systems for Fueling Stations in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The changing regulations in the oil and gas retail sector is expected to be one of the major factors that will have a positive impact on the growth of the market. Price ceiling, market-determined retail fuel prices, and fixed price method are the three major methods used to determine retail fuel price, adopted by various countries. Retailers of fuel who adopt the market-determined fuel prices method are able to set their selling prices freely without any major restrictions. The government provides subsidies to the public OMCs because the price of the fuel is regulated. However, when the fuel prices are regulated, private refiners cannot sell fuel in the domestic retail market as incurs a loss for them. This drives the need for deregulation of fuel in certain countries. As a result, the private players are encouraged to enter the market, which in turn, will boost the number of retail outlets. This in turn, will result in an increased number of gas stations and high adoption of tank gauge systems including the tank level indicator, fuel management system, oil tank monitor, and oil tank level sensor.

The worldwide market for Tank Gauge Systems for Fueling Stations is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
