Abstracts

According to our (Global Info Research) latest study, the global Targeted Advertising Services market size was valued at US\$ 53639 million in 2025 and is forecast to a readjusted size of US\$ 83747 million by 2032 with a CAGR of 6.8% during review period.

Targeted advertising service is a marketing method that uses big data and user behavior analysis technology to accurately deliver advertisements to specific groups of people. By analyzing user interests, age, region, browsing history and other characteristics, advertisers can accurately display advertising content to potential customers, thereby improving advertising conversion rates and delivery efficiency and reducing marketing costs.

The growth of the targeted advertising service market is primarily driven by rising digital marketing budgets, advertisers' increasing need for precision customer acquisition, enhanced platform data capabilities, and the optimization of AI algorithms. As competition intensifies across sectors such as e-commerce, gaming and entertainment, financial services, automotive, local services, FMCG, and B2B enterprise services, advertisers are prioritizing precise audience reach?leveraging user profiles, interest tags, search intent, geolocation, consumption behavior, and remarketing data?to boost click-through rates, conversion rates, and return on ad spend (ROAS). Meanwhile, the rapid expansion of digital channels?including short-form video, social media, search advertising, retail media, mobile app ads, and CTV/OTT advertising?has shifted ad placement strategies from traditional broad-reach exposure toward performance-oriented models that are cross-platform, trackable, and optimizable. Technologies such as AI-driven automated bidding, intelligent creative generation, audience modeling,

attribution analysis, and first-party data management have further enhanced campaign efficiency, prompting advertisers to allocate larger budgets to specialized ad placement platforms, programmatic advertising technology providers, and managed service agencies. Although privacy regulations and the phasing out of third-party cookies have increased the pressure regarding data compliance, they have also accelerated the development of contextual targeting, first-party data targeting, and compliant marketing technologies, collectively fueling sustained growth in the targeted advertising service market.
