Abstracts

The global Targeted SSTR Radionuclide Drug Conjugates market size is expected to reach \$ 1326 million by 2032, rising at a market growth of 6.7% CAGR during the forecast period (2026-2032).

Targeted SSTR Radionuclide Drug Conjugates are precision radiotherapeutics designed to deliver therapeutic radioisotopes to tumor tissue by targeting somatostatin receptors, or SSTR. These products are typically composed of an SSTR-targeting peptide or ligand, a chelator, and a therapeutic radionuclide, with ¹⁷⁷Lu-labeled agents currently representing the most mature commercialized and clinically applied products. This category is mainly used for the treatment of SSTR-positive gastroenteropancreatic neuroendocrine tumors and related indications. Upstream segments mainly include targeting peptides and precursors, chelators, radioisotope production and purification, sterile radiopharmaceutical filling, and specialized cold-chain logistics, while downstream customers mainly consist of general hospitals with nuclear medicine capabilities, oncology specialty centers, and related radiopharmaceutical distribution systems. On a commercial-market basis, the global Targeted SSTR Radionuclide Drug Conjugates market in 2025 remained concentrated in a limited number of marketed products, and the industry as a whole continued to show the characteristics of limited commercialization, ongoing clinical expansion, and simultaneous manufacturing and supply-chain barriers. Because these products combine the economics of innovative oncology drugs with the operational barriers of radiopharmaceutical manufacturing, including isotope supply, dedicated facilities, quality-release requirements, and specialized distribution, gross margin is generally higher than that of conventional small-molecule drugs and standard injectables. In 2025, the gross margin of commercialized Targeted SSTR Radionuclide Drug Conjugates is estimated to be in the range of 55%-70%.

At present, the Targeted SSTR Radionuclide Drug Conjugates industry has entered a development stage driven by a limited number of commercialized products while continuing to expand into broader clinical applications. As the clinical value of radioligand therapy in neuroendocrine tumors becomes increasingly validated, targeted SSTR therapy is evolving from a relatively niche specialty treatment into an important segment within radiopharmaceutical oncology. Overall, this field combines the attributes of precision therapy and radiopharmaceutical platform technology. Market attention continues to rise, and the strategic focus of companies is gradually shifting from single-product development toward indication expansion, manufacturing capacity buildout, and global supply network improvement. The market is therefore moving from an early validation phase toward a more stable commercialization stage.

From the perspective of technology and product evolution, the ^{177}Lu route is expected to remain the mainstream direction in the medium term, mainly because it has a stronger clinical foundation, a more established treatment pathway, and a more complete industrial support system. Future development is likely to continue deepening around core indications such as SSTR-positive gastroenteropancreatic neuroendocrine tumors, while also expanding into additional neuroendocrine tumor subtypes, combination treatment strategies, and more refined patient-selection pathways. At the same time, research on novel ligand structures, optimized dosing approaches, and improved theranostic integration is expected to continue. As a result, competition in this market will gradually shift from individual product competition to broader competition in platform capability, clinical resources, and industry-chain coordination.

From an industrialization perspective, the commercialization of Targeted SSTR Radionuclide Drug Conjugates does not depend solely on the drug product itself. It is highly dependent on radioisotope supply, dedicated manufacturing facilities, quality-release systems, cold-chain and time-sensitive distribution capabilities, and the maturity of nuclear medicine infrastructure at the treatment-center level. Compared with conventional oncology drugs, these products place much higher demands on manufacturing and distribution systems. Therefore, leading companies usually advance capacity expansion, regionalized production networks, and treatment-center coverage in parallel. In the future, companies that establish more stable isotope access, more robust manufacturing systems, and broader hospital networks at an earlier stage will be better positioned during industry expansion. This also means that entry barriers and competitive barriers in this field are likely to remain relatively high.

Nevertheless, the industry still faces multiple constraints. First, stable isotope supply,

the construction cycle of dedicated production capacity, and limited nuclear medicine treatment resources remain important factors restricting further market expansion. Second, patient treatment usually depends on imaging diagnosis, pathological classification, and coordination among specialty centers, while reimbursement systems, hospital access, physician experience, and treatment standards differ across countries and regions, leading to uneven global market development. In addition, as the industry expands toward broader patient populations and more complex treatment regimens, the importance of safety management, long-term follow-up, and standardized treatment pathways will continue to increase. Overall, the Targeted SSTR Radionuclide Drug Conjugates market has clear medium- to long-term growth potential, but its expansion is more likely to take the form of steady growth supported by clinical evidence, supply-chain assurance, and healthcare-system development, rather than rapid short-term scaling.

This report studies the global Targeted SSTR Radionuclide Drug Conjugates demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Targeted SSTR Radionuclide Drug Conjugates, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Targeted SSTR Radionuclide Drug Conjugates that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Targeted SSTR Radionuclide Drug Conjugates total market, 2021-2032, (USD Million)

Global Targeted SSTR Radionuclide Drug Conjugates total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Targeted SSTR Radionuclide Drug Conjugates total market, key domestic companies, and share, (USD Million)

Global Targeted SSTR Radionuclide Drug Conjugates revenue by player, revenue and market share 2021-2026, (USD Million)

Global Targeted SSTR Radionuclide Drug Conjugates total market by Type, CAGR, 2021-2032, (USD Million)

Global Targeted SSTR Radionuclide Drug Conjugates total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Targeted SSTR Radionuclide Drug

Conjugates market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Novartis, ITM Isotope Technologies Munich SE, Orano Med, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Targeted SSTR Radionuclide Drug Conjugates market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Global Targeted SSTR Radionuclide Drug Conjugates Market, By Region:

United States

China

Europe

Japan

South Korea

ASEAN

India

Rest of World

Global Targeted SSTR Radionuclide Drug Conjugates Market, Segmentation by Type:

Monotherapy Products

Combination Therapy Products

Global Targeted SSTR Radionuclide Drug Conjugates Market, Segmentation by Radionuclide Type:

Beta-emitting

Alpha-emitting

Other

Global Targeted SSTR Radionuclide Drug Conjugates Market, Segmentation by Targeting Vector Type:

Small-molecule

Antibody-based

Other

Global Targeted SSTR Radionuclide Drug Conjugates Market, Segmentation by Application:

Hospital

Specialist Clinic

Other

Companies Profiled:

Novartis

ITM Isotope Technologies Munich SE

Orano Med

Key Questions Answered

1. How big is the global Targeted SSTR Radionuclide Drug Conjugates market?
2. What is the demand of the global Targeted SSTR Radionuclide Drug Conjugates market?
3. What is the year over year growth of the global Targeted SSTR Radionuclide Drug Conjugates market?
4. What is the total value of the global Targeted SSTR Radionuclide Drug Conjugates market?
5. Who are the Major Players in the global Targeted SSTR Radionuclide Drug Conjugates market?
6. What are the growth factors driving the market demand?

Contents

1 SUPPLY SUMMARY

- 1.1 Targeted SSTR Radionuclide Drug Conjugates Introduction
- 1.2 World Targeted SSTR Radionuclide Drug Conjugates Market Size & Forecast (2021 & 2025 & 2032)
- 1.3 World Targeted SSTR Radionuclide Drug Conjugates Total Market by Region (by Headquarter Location)
 - 1.3.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Region (2021-2032), (by Headquarter Location)
 - 1.3.2 United States Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
 - 1.3.3 China Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
 - 1.3.4 Europe Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
 - 1.3.5 Japan Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
 - 1.3.6 South Korea Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
 - 1.3.7 ASEAN Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
 - 1.3.8 India Based Company Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2032)
- 1.4 Market Drivers, Restraints and Trends
 - 1.4.1 Targeted SSTR Radionuclide Drug Conjugates Market Drivers
 - 1.4.2 Factors Affecting Demand
 - 1.4.3 Major Market Trends

2 DEMAND SUMMARY

- 2.1 World Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)
- 2.2 World Targeted SSTR Radionuclide Drug Conjugates Consumption Value by Region
 - 2.2.1 World Targeted SSTR Radionuclide Drug Conjugates Consumption Value by Region (2021-2026)
 - 2.2.2 World Targeted SSTR Radionuclide Drug Conjugates Consumption Value

Forecast by Region (2027-2032)

2.3 United States Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

2.4 China Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

2.5 Europe Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

2.6 Japan Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

2.7 South Korea Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

2.8 ASEAN Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

2.9 India Targeted SSTR Radionuclide Drug Conjugates Consumption Value (2021-2032)

3 WORLD TARGETED SSTR RADIONUCLIDE DRUG CONJUGATES COMPANIES COMPETITIVE ANALYSIS

3.1 World Targeted SSTR Radionuclide Drug Conjugates Revenue by Player (2021-2026)

3.2 Industry Rank and Concentration Rate (CR)

3.2.1 Global Targeted SSTR Radionuclide Drug Conjugates Industry Rank of Major Players

3.2.2 Global Concentration Ratios (CR4) for Targeted SSTR Radionuclide Drug Conjugates in 2025

3.2.3 Global Concentration Ratios (CR8) for Targeted SSTR Radionuclide Drug Conjugates in 2025

3.3 Targeted SSTR Radionuclide Drug Conjugates Company Evaluation Quadrant

3.4 Targeted SSTR Radionuclide Drug Conjugates Market: Overall Company Footprint Analysis

3.4.1 Targeted SSTR Radionuclide Drug Conjugates Market: Region Footprint

3.4.2 Targeted SSTR Radionuclide Drug Conjugates Market: Company Product Type Footprint

3.4.3 Targeted SSTR Radionuclide Drug Conjugates Market: Company Product Application Footprint

3.5 Competitive Environment

3.5.1 Historical Structure of the Industry

3.5.2 Barriers of Market Entry

- 3.5.3 Factors of Competition
- 3.6 Mergers & Acquisitions Activity

4 UNITED STATES VS CHINA VS REST OF WORLD (BY HEADQUARTER LOCATION)

- 4.1 United States VS China: Targeted SSTR Radionuclide Drug Conjugates Revenue Comparison (by Headquarter Location)
 - 4.1.1 United States VS China: Targeted SSTR Radionuclide Drug Conjugates Revenue Comparison (2021 & 2025 & 2032) (by Headquarter Location)
 - 4.1.2 United States VS China: Targeted SSTR Radionuclide Drug Conjugates Revenue Market Share Comparison (2021 & 2025 & 2032)
- 4.2 United States Based Companies VS China Based Companies: Targeted SSTR Radionuclide Drug Conjugates Consumption Value Comparison
 - 4.2.1 United States VS China: Targeted SSTR Radionuclide Drug Conjugates Consumption Value Comparison (2021 & 2025 & 2032)
 - 4.2.2 United States VS China: Targeted SSTR Radionuclide Drug Conjugates Consumption Value Market Share Comparison (2021 & 2025 & 2032)
- 4.3 United States Based Targeted SSTR Radionuclide Drug Conjugates Companies and Market Share, 2021-2026
 - 4.3.1 United States Based Targeted SSTR Radionuclide Drug Conjugates Companies, Headquarters (States, Country)
 - 4.3.2 United States Based Companies Targeted SSTR Radionuclide Drug Conjugates Revenue, (2021-2026)
- 4.4 China Based Companies Targeted SSTR Radionuclide Drug Conjugates Revenue and Market Share, 2021-2026
 - 4.4.1 China Based Targeted SSTR Radionuclide Drug Conjugates Companies, Company Headquarters (Province, Country)
 - 4.4.2 China Based Companies Targeted SSTR Radionuclide Drug Conjugates Revenue, (2021-2026)
- 4.5 Rest of World Based Targeted SSTR Radionuclide Drug Conjugates Companies and Market Share, 2021-2026
 - 4.5.1 Rest of World Based Targeted SSTR Radionuclide Drug Conjugates Companies, Headquarters (Province, Country)
 - 4.5.2 Rest of World Based Companies Targeted SSTR Radionuclide Drug Conjugates Revenue (2021-2026)

5 MARKET ANALYSIS BY TYPE

5.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size Overview by Type: 2021 VS 2025 VS 2032

5.2 Segment Introduction by Type

5.2.1 Monotherapy Products

5.2.2 Combination Therapy Products

5.3 Market Segment by Type

5.3.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Type (2021-2026)

5.3.2 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Type (2027-2032)

5.3.3 World Targeted SSTR Radionuclide Drug Conjugates Market Size Market Share by Type (2027-2032)

6 MARKET ANALYSIS BY RADIONUCLIDE TYPE

6.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size Overview by Radionuclide Type: 2021 VS 2025 VS 2032

6.2 Segment Introduction by Radionuclide Type

6.2.1 Beta-emitting

6.2.2 Alpha-emitting

6.2.3 Other

6.3 Market Segment by Radionuclide Type

6.3.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Radionuclide Type (2021-2026)

6.3.2 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Radionuclide Type (2027-2032)

6.3.3 World Targeted SSTR Radionuclide Drug Conjugates Market Size Market Share by Radionuclide Type (2027-2032)

7 MARKET ANALYSIS BY TARGETING VECTOR TYPE

7.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size Overview by Targeting Vector Type: 2021 VS 2025 VS 2032

7.2 Segment Introduction by Targeting Vector Type

7.2.1 Small-molecule

7.2.2 Antibody-based

7.2.3 Other

7.3 Market Segment by Targeting Vector Type

7.3.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Targeting

Vector Type (2021-2026)

7.3.2 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Targeting Vector Type (2027-2032)

7.3.3 World Targeted SSTR Radionuclide Drug Conjugates Market Size Market Share by Targeting Vector Type (2027-2032)

8 MARKET ANALYSIS BY APPLICATION

8.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size Overview by Application: 2021 VS 2025 VS 2032

8.2 Segment Introduction by Application

8.2.1 Hospital

8.2.2 Specialist Clinic

8.2.3 Other

8.3 Market Segment by Application

8.3.1 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Application (2021-2026)

8.3.2 World Targeted SSTR Radionuclide Drug Conjugates Market Size by Application (2027-2032)

8.3.3 World Targeted SSTR Radionuclide Drug Conjugates Market Size Market Share by Application (2021-2032)

9 COMPANY PROFILES

9.1 Novartis

9.1.1 Novartis Details

9.1.2 Novartis Major Business

9.1.3 Novartis Targeted SSTR Radionuclide Drug Conjugates Product and Services

9.1.4 Novartis Targeted SSTR Radionuclide Drug Conjugates Revenue, Gross Margin and Market Share (2021-2026)

9.1.5 Novartis Recent Developments/Updates

9.1.6 Novartis Competitive Strengths & Weaknesses

9.2 ITM Isotope Technologies Munich SE

9.2.1 ITM Isotope Technologies Munich SE Details

9.2.2 ITM Isotope Technologies Munich SE Major Business

9.2.3 ITM Isotope Technologies Munich SE Targeted SSTR Radionuclide Drug Conjugates Product and Services

9.2.4 ITM Isotope Technologies Munich SE Targeted SSTR Radionuclide Drug Conjugates Revenue, Gross Margin and Market Share (2021-2026)

- 9.2.5 ITM Isotope Technologies Munich SE Recent Developments/Updates
- 9.2.6 ITM Isotope Technologies Munich SE Competitive Strengths & Weaknesses
- 9.3 Orano Med
 - 9.3.1 Orano Med Details
 - 9.3.2 Orano Med Major Business
 - 9.3.3 Orano Med Targeted SSTR Radionuclide Drug Conjugates Product and Services
 - 9.3.4 Orano Med Targeted SSTR Radionuclide Drug Conjugates Revenue, Gross Margin and Market Share (2021-2026)
 - 9.3.5 Orano Med Recent Developments/Updates
 - 9.3.6 Orano Med Competitive Strengths & Weaknesses

10 INDUSTRY CHAIN ANALYSIS

- 10.1 Targeted SSTR Radionuclide Drug Conjugates Industry Chain
- 10.2 Targeted SSTR Radionuclide Drug Conjugates Upstream Analysis
- 10.3 Targeted SSTR Radionuclide Drug Conjugates Midstream Analysis
- 10.4 Targeted SSTR Radionuclide Drug Conjugates Downstream Analysis
