The global Taxiway Light market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In general, the market outlook for taxiway lights is expected to be positive due to the increasing demand for air travel and the need for improved airport infrastructure. The growth of global air traffic is expected to drive the demand for airport lighting solutions, including taxiway lights. Additionally, regulatory requirements for improving safety standards at airports are expected to drive the market growth for taxiway lights. Advancements in lighting technology, including LED lighting solutions, are also expected to boost the market growth for taxiway lights as they offer greater efficiency, durability, and long-term cost savings. Overall, the market outlook for taxiway lights is expected to be positive over the forecast period.

Taxiway lights are a type of airport lighting used to guide pilots and ground crews during aircraft taxiing. They are usually blue in color and are located along the edges of taxiways, and sometimes in the centerline or center of the turn-off areas. The lighting of the taxiway aids in maintaining the safety and security of the airport movement areas, which include runways and taxiways.
