Abstracts

The global Tea Bag market size is expected to reach \$ 20680 million by 2032, rising at a market growth of 2.8% CAGR during the forecast period (2026-2032).

Tea bag is a small, porous, sealed bag containing dried plant material, which is immersed in boiling water to make a hot drink. Classically these are tea leaves, but the term is also used for herbal teas (tisanes) made of herbs or spices. Tea bags are commonly made of filter paper or food-grade plastic, or occasionally of silk. The bag contains the tea leaves while the tea is steeped, making it easier to dispose of the leaves, and performs the same function as a tea infuser. Some tea bags have an attached piece of string with a paper label at the top that assists in removing the bag while also displaying the brand or variety of tea.

Top 3 players which are Lipton (Unilever), Twinings (Associated British Foods), Tetley (Tata Global Beverages) take about 35% of the market.

This report studies the global Tea Bag production, demand, key manufacturers, and key regions.
