Abstracts

The global Teak Wood Furniture market size is expected to reach \$ 5329 million by 2032, rising at a market growth of 3.7% CAGR during the forecast period (2026-2032). Teak furniture refers to solid wood furniture made primarily from natural teak, covering a wide range of products such as tables, chairs, sofas, beds, cabinets, and complete outdoor furniture sets. Owing to its high natural oil content, structural stability, and strong resistance to moisture, decay, and insects, teak is widely used in furniture that requires long service life and environmental adaptability. Compared with conventional wooden furniture, teak furniture emphasizes durability, natural aesthetics, and overall quality, and is commonly used in premium residential, villa, and hospitality environments. In 2025, global teak furniture sales reached approximately 8,000 K Units, with an average price of 500 US\$/Unit.

The growth of the teak furniture market is driven by the expansion of middle- and high-income consumer groups, the upgrading of residential living standards, and the increasing popularity of outdoor and leisure-oriented lifestyles. As housing consumption shifts from purely functional needs to quality- and experience-driven choices, consumers increasingly prefer solid wood furniture that offers durability, low maintenance, and natural aesthetics. In parallel, hotels, resorts, and high-end commercial spaces continue to demand furniture with long service life, stable appearance, and sustainable sourcing, further supporting the adoption of teak furniture in contract and hospitality applications.
