The global Tech Water Bottles market size is expected to reach \$ 660.7 million by 2029, rising at a market growth of 11.5% CAGR during the forecast period (2023-2029).

The high-tech water bottle is based on IoT technology, and the smart bottle interacts with the device installed with the app, allowing the sharing of usage information. Tech water bottles feature new technology to help track and improve your drinking habits. Smart water bottles can be linked to a phone app that can often track how much water is consumed, your goal ounces for the day, and how much you have left to drink. Plus, some of these smart water bottles capture more advanced data to pair with a fitness app or tracker. Smart Pill Bottle Function: Automatically tracks when the bottle is opened and will mark the dose as 'taken' if you have a scheduled dose. You can also setup 'take as needed' medications and use the app to see your entire history. Smart Feeding Bottle Facilitates parents to create best formula milk for babies and analytics to track and monitor baby growth conditions in real time.
