Abstracts

The global Technical Grade Lithium Concentrate market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Lithium concentrate is used in numerous applications which can be divided into two broad categories: chemical applications and technical applications. Currently, the largest global market for lithium is for use in glass and ceramics (technical applications). And the fastest growing (and second-largest) market for lithium globally is for use in batteries (chemical applications).

Technical grade lithium concentrates range in lithium content from 4.1% to 7.5% Li₂O but achieve additional specifications such as ultra-low levels of iron. Alkaline content for ceramics is also important with
