Abstracts

According to our (Global Info Research) latest study, the global Technology of Three Dimensional Flow Impeller market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The three-dimensional flow design technology divides the three-dimensional space inside the impeller infinitely according to the 'three-dimensional flow theory'. Perform meshing and flow field calculations. The three-dimensional flow design method is used to optimize the entry and exit angles of the blades, the number of blades, and the shape of each section of the twisted blades. The velocity distribution of all the internal flow particles can obtain the most stable flow state inside the pump to ensure the best effect of fluid delivery.
