Abstracts

The global Teflon Balls market size is expected to reach \$ 293 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Global sales of Teflon Balls was about 12540 tons in 2025 with average price of 16920 USD/ton. The average gross margin of the industry is between 15%-20%.

Teflon Balls are spherical components made from polytetrafluoroethylene (PTFE, ?Teflon?), typically produced by molding and then finishing (e.g., precision grinding) to meet diameter/sphericity requirements. They are valued for their very low friction / non-stick surface, excellent chemical resistance, and wide service temperature range, so they're commonly used in ball/check/relief/float valves, pumps, seals, and light-load bearing or rolling applications.

This report studies the global Teflon Balls production, demand, key manufacturers, and key regions.
