The global Telepresence Robots with Manipulators market size is expected to reach \$ 8918 million by 2032, rising at a market growth of 14.1% CAGR during the forecast period (2026-2032).

In 2025, global Telepresence Robots with Manipulators production reached approximately 0.34 million units, with an average global market price of around US\$ 10,000 per unit. Annual production capacity is 0.5 million units. Gross Profit Margin: 40%. Telepresence robots with manipulators are remotely operated robotic systems that combine mobile telepresence capabilities (audio-visual communication, real-time remote presence) with robotic arms or manipulators, enabling users to not only see, hear, and communicate from a distance but also physically interact with the environment. Upstream includes cameras, sensors, robotic arms, actuators, and communication modules; midstream covers robot manufacturers and system integrators; downstream includes hospitals, industrial users, and research institutions. Growth will be steady as costs fall and remote operation becomes easier, with wider adoption in healthcare and industrial use cases.
