According to our (Global Info Research) latest study, the global TEM Holders market size was valued at USD 227.4 million in 2023 and is forecast to a readjusted size of USD 410 million by 2030 with a CAGR of 8.8% during review period.

TEM Holders is one of the important components of the transmission electron microscope. It is an important part to achieve special observation requirements (such as in-situ observation, mechanical, thermal, and electrical testing). The stress is all achieved through the sample stem. The current commercial TEM sample holders can be divided into four types: In Situ Holder, Regular Holders (single-tilt and double-tilt), Cryo Holders, and Tomography Holders. At present, TEM Holders must develop towards a larger tilting range and more precise and rapid control on the premise of realizing other functions (mechanics, electricity, heat, in-situ testing, 3D reconstruction).

The key manufacturers of TEM Holders in the world include Gatan, DENSSolutions, Hummingbird Scientific, Protochips, Kitano Seiki, Thermo Fisher Scientific (FEI), Fischione, Mel-Build, ZoNexus, ZEPTools Technology, PicoFemto and Xiamen Chipnova Technology, among which the top five manufacturers account for more than 60% of the market share, and the largest manufacturer is DENSSolutions. The global production of TEM holders is mainly distributed in North America, Europe, China and Japan, among which the first two key production regions account for nearly 80% of the market share. At present, North America is the largest production region, accounting for nearly 60% of the market share, followed by Europe and Japan. In terms of products, the relative growth rate of the in-situ holders is faster, and the current market share is more than 50%, followed by the regular holders. In terms of application, life science is the largest application field, with more than 50% market share, followed by material science.

The Global Info Research report includes an overview of the development of the TEM Holders industry chain, the market status of Life Science (In Situ Holder, Regular Holders (Single Tilt and Double Tilt)), Material Science (In Situ Holder, Regular Holders (Single Tilt and Double Tilt)), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of TEM Holders.

Regionally, the report analyzes the TEM Holders markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness.
