Abstracts

A temperature transmitter is an electrical instrument that interfaces a temperature sensor (e.g. thermocouple, RTD, or thermistor) to a measurement or control device (e.g. PLC, DCS, PC, loop controller, data logger, display, recorder, etc.). Typically, temperature transmitters isolate, amplify, filter noise, linearize, and convert the input signal from the sensor then send (transmit) a standardized output signal to the control device. Common electrical output signals used in manufacturing plants are 4-20mA or 0-10V DC ranges.

Scope of the Report:

This report focuses on the Temperature Transmitters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. With the development of automobile industries, temperature transmitters market is becoming increasingly important. The increasing demand for temperature transmitters drives the market. The awareness of environmental pollution and rapid industrialization are expected to propel the market. Temperature transmitters help in simplifying engineering design, minimizing maintenance cost while facilitating advanced diagnostics in various industrial applications. Transmitters help in an accurate forecast of temperature which is an integral function of meteorology department. Temperature transmitters and humidity sensors remove fog and dew from the vehicle windshields in bad weather which makes them useful for automotive industry. A cleanroom is a place where the atmosphere is maintained and regulated to help scientific research which is done by temperature transmitters and other sophisticated instruments. Asia Pacific is estimated to maintain its position over the forecast period, In North America, the market

is anticipated to grow owing to the increasing demand in automotive industry. The worldwide market for Temperature Transmitters is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
