Abstracts

According to our (Global Info Research) latest study, the global Template Sewing Machine market size was valued at US\$ 176 million in 2025 and is forecast to a readjusted size of US\$ 298 million by 2032 with a CAGR of 5.6% during review period.

In 2025, global Template Sewing Machine production reached 45,000 units, with an average selling price of USD 3,800 per unit, production capacity of 58,000 units, and a gross margin of 28.5%.

Template Sewing Machine is an automated sewing equipment that integrates an industrial sewing machine, computerized control system, X/Y-axis motion platform, and dedicated template fixture. After fabric or leather pieces are placed into the template, the machine can complete programmed stitching paths automatically. It is mainly used in apparel, bags and luggage, footwear, automotive interiors, home textiles, and upholstered furniture, especially for repetitive sewing processes requiring high stitch consistency. Compared with traditional manual sewing, template sewing machines help reduce reliance on skilled operators, improve sewing stability, and increase batch production efficiency, making them suitable for multi-style, small-batch, and standardized component sewing.

Template Sewing Machines are specialized automated equipment within the industrial sewing machine sector, mainly serving apparel, bags and luggage, footwear, automotive interiors, home textiles, and upholstered furniture manufacturing. As downstream factories place greater emphasis on stitch consistency, lower rework, reduced dependence on skilled operators, and more stable production quality, template sewing machines are expanding from standard garment sewing processes to thicker

materials, multi-layer materials, and irregular component sewing. The current market is led largely by Chinese manufacturers, with product development moving from basic template sewing toward rotating heads, heavy-material processing, larger sewing areas, vision positioning, template recognition, and intelligent process management.
