## Abstracts

The global Temporary Air Mattress market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

A temporary air mattress is inflatable and portable. This type of mattress is typically made with vinyl or similar materials. It can be used in place of a regular mattress for certain scenarios, but is not intended for extended use. Air mattresses are often used on camping and road trips. The mattress can be deflated, rolled or folded, and stored in a carrying bag for easy transport. Most air mattresses weigh between 10 and 20 pounds, meaning they can be packed and carried on hiking or backpacking trips. An air mattress can also be used indoors as guest accommodations or as a temporary bed for those who have moved or are waiting for a new mattress to arrive.
