Tension Fabric Frames are a type of display system designed to hold fabric graphics under tension, creating a smooth and wrinkle-free surface. The fabric is stretched over a lightweight, often aluminum frame and secured at the edges, either through a pocket or by using clips or hooks. This tensioning method ensures that the graphic stays taut, providing a clean and professional look. Tension fabric frames are commonly used for trade shows, events, retail displays, and large-format signage, offering an easy-to-assemble, versatile solution with the option for backlighting for enhanced visibility.
