Terahertz security body scanner is a security device that uses terahertz waves for non-contact, non-invasive scanning. Terahertz waves are located in the band between microwaves and infrared rays in the electromagnetic spectrum. They can penetrate clothing and other non-conductive materials, but cannot penetrate water and metal. This scanner can detect objects hidden under clothing, including metal and non-metal contraband, explosives, weapons, etc., while having minimal impact on human health because it does not produce ionizing radiation.
