According to our (Global Info Research) latest study, the global Terminal Operating Systems (TOS) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Terminal operating systems (TOS) manage the movement of containers at cargo terminals. Managers of cargo terminals use TOS software to monitor a range of activities across an entire port or inland terminal and maximize efficiency when loading and unloading container ships and other vehicles. These systems help terminal managers coordinate complex daily logistics involving ships, trains, trucks, cranes, various types of cargo, and port workers. Cargo terminal professionals use a TOS to manage vessel and equipment scheduling, track the movements of cargo containers, optimize space allocation in the yard, and make decisions based on real-time information about terminal operations.
