Abstracts

The increase in the number of endpoints and the increase of BYOD in the enterprise, the increase in endpoint attacks and vulnerabilities, the increased costs caused by endpoint attacks, the reduction of IT risks, and the protection and management of centralized management have promoted the endpoint security market. The endpoint security market is segmented by solution into endpoint protection platforms (EPP) and endpoint detection and response (EDR). Due to the growing demand for threat detection and remediation during any endpoint security breach or attack, the EDR segment is expected to become the fastest growing segment of the endpoint security market. These technologically advanced solutions help detect and remediate the latest known and unknown threats. It provides the first line of defense for the organization to protect the endpoint.
