According to our (Global Info Research) latest study, the global Termite Bait Systems market size was valued at USD 234.1 million in 2023 and is forecast to a readjusted size of USD 289.1 million by 2030 with a CAGR of 3.1% during review period.

Termite baits consist of paper, cardboard, or other acceptable termite food, combined with a slow-acting substance lethal to termites. The bait must be good enough to compete with the presence of competing tree roots, stumps, woodpiles and structural wood.

North America accounted for the largest share in 2017; followed by Asia Pacific, owing to the growing adoption of termite bait systems in countries such as the US, Canada, Australia, and China. Subterranean termites are widespread in North America and responsible for 90% of the management and damage costs in the US. In addition, the use of termite bait systems is high in the residential sector due to the presence of a large number of wooden houses, consumer awareness, and the strong presence & consumer reach of service providers in this region. Thus, the North American region dominated the termite bait systems market in 2017.
