The global Terracotta Tiles market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Terracotta bricks are a building material made of clay, usually in red or brown-red colour. Terracotta bricks are usually used in the decoration and structure of exterior walls, interior walls, partition walls, columns and other parts of building walls. Its red color and rough texture bring a special natural beauty to buildings. Terracotta bricks also have good thermal insulation properties, and their red color itself also has a certain reflective ability, which reduces the heat absorbed by buildings in summer.
