According to our (Global Info Research) latest study, the global Tert-Butyl Peroxyneodecanoate market size was valued at US\$ 34.57 million in 2025 and is forecast to a readjusted size of US\$ 44.06 million by 2032 with a CAGR of 3.6% during review period.

Tert-Butyl Peroxyneodecanoate (CAS No. 26748-41-4), abbreviated as TBPND, is an organic peroxide. It serves as a highly efficient free-radical polymerization initiator and finds significant application in the modern polymer chemical and materials industries.

The upstream sector primarily revolves around sources of the tert-butyl peroxy group, neodecanoic acid (or its acylated derivatives), aliphatic diluents, and stabilizers. Among raw material costs, neodecanoic acid-based inputs and tert-butyl peroxide intermediates exert the most significant influence. The midstream segment involves organic peroxide manufacturers conducting low-temperature controlled reactions, purification, dilution, stabilization, packaging, and cold-chain storage and transportation; the downstream sector primarily feeds into the production of polyolefins, PVC, acrylic resins, and specialized transparent polymers.

In 2025, global sales volume is projected to reach approximately 4,800 tons, with an average global market price of approximately US\$7,000 per ton; the gross margins for major industry manufacturers are expected to range between 25% and 40%.
