Abstracts

According to our (Global Info Research) latest study, the global Test-Driven Development (TDD) Tools market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Test-driven development (TDD) software development methodology strongly emphasizes building tests before generating actual code. TDD is the process of rigorous software testing before generating prototypes to prove the code against various failure scenarios. As a result, the prototype becomes less buggy and more suitable for beta testing with software testers or some focus group among the end-user pool. Code generated through a TDD process is more maintainable and reliable.
